The Sacred In-Between: The Mediating Roles of Architecture Thomas Barrie, 2013-09-13 The sacred place was and still is an intermediate zone created in the belief that it has the ability to co join the religious aspirants to their gods An essential means of understanding this sacred architecture is through the recognition of its role as an in between place Establishing the contexts approaches and understandings of architecture through the lens of the mediating roles often performed by sacred architecture this book offers the reader an extraordinary insight into the forces behind these extraordinary buildings Written by a well known expert in the field the book draws on a unique range of cases reflecting on these inspiring places their continuing ontological significance and the lessons they can offer today Fascinating reading for anyone interested in sacred architecture

Modern Architecture and the Sacred Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

The Hermeneutics of Sacred Architecture: Hermeneutical calisthenics : a morphology of ritual-architectural priorities Lindsay Jones, 2000 The two volumes of this investigation into how we perceive sacred architecture propose an original interpretation of built environments as ritual architectural events Exploring the world s cultures and religious traditions Volume One maps out patterned responses to sacred architecture according to the human experience mechanism interpretation and comparison of architecture Volume Two an exercise in comparative morphology offers a comprehensive framework of ritual architectural priorities by looking at architecture as orientation as commemoration and as ritual context

Sacred Power, Sacred Space Jeanne Halgren Kilde, 2008-07-21 Jeanne Halgren Kilde s survey of church architecture is unlike any other Her main concern is not the buildings themselves but rather the dynamic character of Christianity and how church buildings shape and influence the religion Kilde argues that

a primary function of church buildings is to represent and reify three different types of power divine power or ideas about God personal empowerment as manifested in the individual's perceived relationship to the divine and social power meaning the relationships between groups such as clergy and laity Each type intersects with notions of Christian creed cult and code and is represented spatially and materially in church buildings Kilde explores these categories chronologically from the early church to the twentieth century She considers the form organization and use of worship rooms the location of churches and the interaction between churches and the wider culture Church buildings have been integral to Christianity and Kilde's important study sheds new light on the way they impact all aspects of the religion Neither mere witnesses to transformations of religious thought or nor simple backgrounds for religious practice church buildings are in Kilde's view dynamic participants in religious change and goldmines of information on Christianity itself *Sacred Spaces* G. J.

Wightman, Gregory J. Wightman, 2007 A great deal has been written about religious architecture in ancient cultures but the great bulk of the literature has tended to be culture specific Wightman's volume offers for the first time a comprehensive synopsis of the rich manifestations of religious architecture throughout the ancient world In addition the book provides a conceptual framework within which cross cultural comparisons of religious architecture may usefully take place and tackles some fundamental issues in relation to the definition and characterisation of sacred space in ancient contexts The last fifteen years have witnessed the focusing of a great deal of scholarly attention on the archaeology of religions with the result that today researchers are able to make use of a broad armoury of theoretical and methodological approaches Yet theory must at all times be tested against material evidence and here Wightman's volume is timely in laying out empirical data pertaining to all the major traditions of religious architecture in antiquity The book is comprised of twenty one chapters divided into five parts Beginning around twelve thousand years ago at the transition of the Holocene the book embarks on an explorative journey around the ancient globe ending between the 3rd and 5th centuries AD The first four parts of the book deal with broad regions of the ancient world Western Pre Classical Europe and the Mediterranean the Graeco Roman world South and East Asia and the Americas Part Five covering about a quarter of the book has three chapters each dealing with aspects of sacred space Identity and Meaning Language of Sacred Space Text and Image The text is complemented by approximately 400 line drawings in colour many of which are Wightman's reconstructions of ancient temples and sanctuaries and 200 photographic plates most in colour The volume is rounded off by a comprehensive bibliography with essential literature highlighted benefiting both the general reader and specialists Wightman's book will become a work of reference to those interested in gaining or furthering an understanding of architecture archaeology and religion in the ancient world

America's Religious Architecture Marilyn J. Chiat, 1997-10-07 From the Moorish synagogue in small Texas town to the New England meetinghouse nestled in the palm trees of Hawaii this comprehensive historical survey of America's religious architecture celebrates the country's ethnic and spiritual diversity through the magnificent breadth of these community

landmarks The first comprehensive architectural and cultural history of its kind the book features 500 places of worship nationwide many listed on the National Register of Historic Places Includes over 300 black and white photographs and foreword by Bill Moyers creator of the PBS Genesis series **The Return of Sacred Architecture** Herbert Bangs, 2006-11-14 An inspirational call for a return to the tenets of traditional architecture as a remedy for the dehumanizing standards of modern architecture Explains how modern architecture is emblematic of our current estrangement from the spiritual principles that shaped humanity's greatest civilizations Reveals how the ancient laws of sacred proportion and harmony can be restored The ugly buildings that characterize the modern landscape are inferior not only to the great cathedrals of medieval Europe and the temples of ancient Egypt and Greece but even to lesser buildings of the more recent past The great masterworks of our ancestors spoke to humanity's higher nature Architect Herbert Bangs reveals how today's dysfunctional buildings bring out the worst in humanity reinforcing that which is most base within us He shows how through the ancient laws of proportion and number architecture once expressed the harmonious relationship between man and the cosmos In early times the architect worked within a sacred and esoteric tradition of creating structures through which human beings could gain insight into the nature of the divine reality Today that tradition has been abandoned in favor of narrowly defined utilitarian principles of efficiency and economy In *The Return of Sacred Architecture* Bangs provides the key to freeing architecture from the crude functionality of the twentieth century the architects of the modern human landscape must find the deep felt connection to the cosmos that guided the inner lives of those who built the temples of the past The form of their buildings will then reflect the sacred patterns of geometry and proportion and bring forth greater harmony in the world Sacred architecture A. T. Mann, 1996 Sacred Architecture, Its Rise, Progress, and Present State Richard Brown, 1845
