Between Two Fires Stephen J. Pyne, 2015-10-15 From a fire policy of prevention at all costs to today's restored burning Between Two Fires is America's history channeled through the story of wildland fire management Stephen J Pyne tells of a fire revolution that began in the 1960s as a reaction to simple suppression and single agency hegemony and then matured into more enlightened programs of fire management It describes the counterrevolution of the 1980s that stalled the movement the revival of reform after 1994 and the fire scene that has evolved since then Pyne is uniquely qualified to tell America's fire story The author of more than a score of books he has told fire's history in the United States Australia Canada Europe and the Earth overall In his earlier life he spent fifteen seasons with the North Rim Longshots at Grand Canyon National Park In Between Two Fires Pyne recounts how after the Great Fires of 1910 a policy of fire suppression spread from America's founding corps of foresters into a national policy that manifested itself as a costly all out war on fire After fifty years of attempted fire suppression a revolution in thinking led to a more pluralistic strategy for fire's restoration The revolution succeeded in displacing suppression as a sole strategy but it has failed to fully integrate fire and land management and has fallen short of its goals Today the nation's backcountry and increasingly its exurban fringe are threatened by larger and more damaging burns fire agencies are scrambling for funds firefighters continue to die and the country seems unable to come to grips with the fundamentals behind a rising tide of megafires Pyne has once again constructed a history of record that will shape our next century of fire management Between Two Fires is a story of ideas institutions and fires It's America's story told through the nation's flames

Nature's Burdens Daniel Nelson, 2017-05-15 Nature s Burdens is a political and intellectual history of American natural resource conservation from the 1980s into the twenty first century a period of intense political turmoil shifting priorities among federal policymakers and changing ideas

about the goals of conservation Telling a story of persistent activism conflict and frustration but also of striking achievement it is an account of how new ideas and policies regarding human relationships to plants animals and their surroundings have become vital features of modern environmentalism In the 1960s and 1970s Congress embraced the largely dormant movement to preserve distinctive landscapes and the growing demand for outdoor recreation establishing an unprecedented number of parks monuments and recreation areas The election of Ronald Reagan and a shift to a Republican controlled Senate brought this activity to an abrupt halt and introduced a period of intense partisanship and legislative gridlock that extends to the present In this political climate three developments largely defined the role of conservation in contemporary society environmental organizations have struggled to defend the legal status quo private land conservation has become increasingly important and the emergence of potent scientific voices has promoted the protection of animals and plants and injected a new sense of urgency into the larger cause These developments mark this period as a distinctive and important chapter in the history of American conservation Scrupulously researched scientifically and politically well informed concise and accessibly written *Nature's Burdens* is the most comprehensive examination of recent efforts to protect and enhance the natural world It will be of interest to environmental historians environmental activists and any general reader interested in conservation

Integrated fire management voluntary guidelines Food and Agriculture Organization of the United Nations, 2024-06-28 Damaging wildfires in many parts of the world in recent years have prompted an increase in demand for technical support for integrated fire management As part of the response FAO and the UN Environment Programme UNEP established the Global Fire Management Hub Fire Hub which was launched at the 8th International Wildland Fire Conference in May 2023 The aim of the Fire Hub is to strengthen the capacity of countries to implement integrated fire management and reduce the negative effects of wildfires on people landscapes and the global climate One of the Fire Hub's first activities was to update FAO's Fire Management Voluntary Guidelines Principles and strategic actions which was first published in 2006 to guide implementation of integrated fire management at the landscape level enhance best fire management practices including cultural practices for sustainable land use and engage diverse stakeholders This second edition of the guidelines now titled *Integrated Fire Management Voluntary Guidelines Principles and strategic actions* benefited from contributions from the Global Fire Monitoring Center GFMC the International Liaison Committee of the International Wildland Fire Conferences and Regional Fire Management Resource Centers of the GFMC's Global Wildland Fire Network In addition FAO engaged with experts in countries and specialized partner institutions for insights into new developments and solutions in integrated fire management

Into the Inferno Stuart Palley, 2022-04-26 In the tradition of *Young Men and Fire* and *Fire on the Mountain* Stuart Palley's memoir *Into the Inferno* documents eight years of devastating wildfire in California showing how fire can transform a landscape as well as a soul For nearly a decade Palley has been on the front line of fire He has witnessed homeowners on the worst day of their lives He's seen puddles of aluminum where cars

were once parked He s watched as 150 foot walls of flame cascaded down mountainsides and crashed into the Pacific Ocean And he s captured time and again the tireless commitment of firefighters as they work to save lives and homes in terrain where fire always seems to have the upper hand In this memoir Palley recalls how he went from learning to be safe on the fire line to a fire savvy documentarian of wildfire and climate change He covers some of California s largest most destructive and deadliest fires between 2012 and 2020 lugging his gear from the Wine Country Fire Siege to the Thomas Fire and ultimately to the Woolsey Fire in Malibu And he shows how in a relatively short span of time fire season in California has grown into a perpetual crisis requiring billions of dollars and thousands of firefighters each year Ultimately the experiences the voices and the science shared in the memoir form an urgent call for climate action Into the Inferno stands alongside Palley s photography to show just what kind of environmental tragedy we can expect if we do nothing

The Northern Rockies Stephen J. Pyne, 2016-09-13 The Northern Rockies is part of the multivolume series describing the nation s fire scene region by region The volumes in To the Last Smoke also cover Florida the Northern Rockies the Great Plains the Southwest and several other critical fire regions Provided by publisher

Florida Stephen J. Pyne, 2016-03-31 In this important new collection of essays on the region Stephen J Pyne colorfully explores the ways the region has approached fire management Florida has long resisted national models of fire suppression in favor of prescribed burning for which it has ideal environmental conditions and a robust culture Out of this heritage the fire community has created institutions to match The Tallahassee region became the ignition point for the national fire revolution of the 1960s Today it remains the Silicon Valley of prescription burning How and why this happened is the topic of a fire reconnaissance that begins in the panhandle and follows Floridian fire south to the Everglades

The Northeast Stephen J. Pyne, 2019-04-09 Repeatedly if paradoxically the Northeast has led national developments in fire Its intellectuals argued for model preserves in the Adirondacks and at Yellowstone oversaw the first mapping of the American fire scene for the 1880 census staffed the 1896 National Academy of Sciences forest commission that laid down guidelines for the national forests and spearheaded legislation that allowed those reserves to expand by purchase It trained the leaders who staffed those protected areas and produced most of America s first environmentalists The Northeast has its roster of great fires beginning with dark days in the late 18th century followed by a chronicle of conflagrations continuing as late as 1903 and 1908 with a shocking after tremor in 1947 It hosted the nation s first forestry schools It organized the first interstate and international fire compact And it was the Northeast that pioneered the transition to the true Big Burn industrial combustion as America went from burning living landscapes to burning lithic ones In this new book in the To the Last Smoke series renowned fire expert Stephen J Pyne narrates this history and explains how fire is returning to a place not usually thought of in America s fire scene He examines what changes in climate and land use mean for wildfire what fire ecology means for cultural landscapes and what experiments are underway to reintroduce fire to habitats that need it The region s great fires have gone its influence on the national scene has not The Northeast A Fire

Survey samples the historic and contemporary significance of the region and explains how it fits into a national cartography and narrative of fire Included in this volume How the region shaped America s understanding and policy toward fire How fire fits into the region today and what that means for the country overall What changes in climate land use and institutions may mean for northeastern fire both wild and tame
