Beyond Objectivism And Relativism Science Hermeneutics And Praxis:

Beyond Objectivism and Relativism Richard J. Bernstein, 2011-09-16 Drawing freely and expertly from Continental and analytic traditions Richard Bernstein examines a number of debates and controversies exemplified in the works of Gadamer Habermas Rorty and Arendt He argues that a new conversation is emerging about human rationality a new understanding that emphasizes its practical character and has important ramifications both for thought and action Real Knowing Linda Alcoff, 1996 Real knowing always involves a political dimension Linda Martin Alcoff suggests But this does not mean we need to give up realism or the possibility of truth Recent work in continental philosophy insists on the influence that power and desire exert on knowing whereas contemporary analytic philosophy largely ignores these political concerns in its accounts of justification and truth Alcoff engages these traditionally conflicting approaches in a constructive dialogue effectively spanning the analytic continental divide In provocative readings of major figures in the continental tradition Alcoff shows that the work of Hans Georg Gadamer and Michel Foucault can help rectify key problems in coherence epistemology such as the link between coherence and truth She also argues that discussions about knowledge among continental philosophers can benefit from the work of analytic philosophers Donald Davidson and Hilary Putnam on meaning and ontology Alcoff makes a compelling case for the need to address truth as a metaphysical issue in contrast to minimalist tendencies in Anglo American philosophy and deconstructionism on the continent Her work persuasively argues for coherentist epistemology as a more realistic reconfiguration of the ontology of truth

The New Constellation Richard J. Bernstein, 2013-06-12 In this major new work Bernstein explores the ethical and political dimensions of the modernity post modernity debate Bernstein argues that modernity post modernity should be understood as a kind of mood one which is amorphous shifting and protean but which exerts a powerful influence on our current thinking Focusing on thinkers such as Heidegger Derrida Foucault Habermas and Rorty Bernstein probes the strengths and weaknesses of their work and shows how they have contributed to the formation of a new mood a new and distinctive constellation of ideas This new constellation has put ethical and political issues back on the philosophical agenda forcing us to confront anew the Socratic question How should I live

Special Educational Needs and Inclusive Education: Inclusive education David R. Mitchell, 2004 Demonstrates how the fields of special education and inclusive education have evolved philosophically and technically over the past 30 years

Curriculum Studies:

Curriculum knowledge David Scott, 2003 *Gadamer's Hermeneutics and the Art of Conversation* Andrzej

Wierciński, 2011 Gadamer's Hermeneutics and the Art of Conversation covers the nature of dialogue and understanding in Hans Georg Gadamer's linguistically oriented hermeneutics and its relevance for contemporary philosophy This timely collection of essays stresses the fundamental significance of the other for a further development of Heidegger's analytics of Dasein By recognizing the priority of the other over oneself Gadamerian hermeneutics founds a culture of dialogue sorely needed in our multi cultural globalized community The essays solicited for this volume are presented in three thematic blocks Hermeneutic

Conversation Hermeneutics Aesthetics and Transcendence Hermeneutic Ethics Education and Politics The volume proposes a dynamic understanding of hermeneutics as putting into practice the art of conversation Marxism, Pragmatism, and Postmetaphysics Ulf Schulenberg, 2019-02-15 From Finding to Making offers the first detailed discussion of the relationship between Marxism and pragmatism These two philosophies of praxis are not incompatible and an analysis of their relation helps one to better understand both Establishing a transatlantic theoretical dialogue this book discusses similarities and differences between these philosophies It is an interdisciplinary study that brings together philosophy American and European intellectual history and literary studies Schulenberg's book shows that if we seek to continue the unfinished project of establishing a genuinely postmetaphysical culture the attempt to elucidate the dialectics of Marxism and pragmatism is a good starting point The book offers detailed discussions of Sidney Hook Georg Lukács Theodor W Adorno Fredric Jameson W E B Du Bois John Dewey Richard Rorty and Jacques Rancière

Academic Literacy and the Nature of Expertise Cheryl Geisler, 2013-11-05 The first full length account integrating both the cognitive and sociological aspects of reading and writing in the academy this unique volume covers educational research on reading and writing rhetorical research on writing in the disciplines cognitive research on expertise in ill defined problems and sociological and historical research on the professions The author produced this volume as a result of a research program aimed at understanding the relationship between two concepts literacy and expertise which traditionally have been treated as quite separate phenomena A burgeoning literature on reading and writing in the academy has begun to indicate fairly consistent patterns in how students acquire literacy practices This literature shows furthermore that what students do is quite distinct from what experts do While many have used these results as a starting point for teaching students how to be expert the author has chosen instead to ask about the interrelationship between expert and novice practice seeing them both as two sides of the same project a cultural historical professionalization project aimed at establishing and preserving the professional privilege The consequences of this professionalization project are examined using the discipline of academic philosophy as the site for the author's investigations Methodologically unique these investigations combine rhetorical analysis protocol analysis and the analysis of classroom discourse The result is a complex portrait of how the participants in this humanistic discipline use their academic literacy practices to construct and reconstruct a great divide between expert and lay knowledge This monograph thus extends our current understanding of the rhetoric of the professions and examines its implications for education Integral Pluralism Fred Dallmayr, 2010-03-26 In addition to war terrorism and unchecked military violence modernity is also subject to less visible but no less venomous conflicts Global in nature these culture wars exacerbate the tensions between tradition and innovation virtue and freedom Internationally acclaimed scholar Fred Dallmayr charts a course beyond these persistent but curable dichotomies in Integral Pluralism Beyond Culture Wars Consulting diverse fields such as philosophy literature political science and religious studies Dallmayr equates modern history with a process of steady pluralization This process

which Dallmayr calls integral pluralism requires new connections and creates ethical responsibilities Dallmayr critically compares integral pluralism against the theories of Carl Schmitt the Religious Right international realism and so called political Islam Drawing on the works of James Heidegger Gadamer and Merleau Ponty Integral Pluralism offers sophisticated and carefully researched solutions for the conflicts of the modern world **From the Heart of Our People** Orlando O.
