Learning Directory ,1972 Heidegger and the Global Age Antonio Cerella,Louiza Odysseos,2017-10-18 Globalization is one of the most contested and ab used concepts of our time Whether one interprets it as a collective illusion or as the final stage of capitalism as uncontrollable multitude or as a radical opening of new spaces of freedom the global age represents the conceptual and existential background of our being in the world But what lies behind this process What mode of human existence is brought about by the age of technology and global mobilization And is it possible to attempt a unitary interpretation of this age that presents itself as both total and pluralistic This volume rethinks these epochal questions in light of Martin Heidegger s complex hermeneutics proposing at the same time that such questions enable the interrogation of some of its most fundamental aspects the metanarrative of Seinsgeschichte as withdrawal of Being the structure of human existence within the frame of technology the relation between humanism and nihilism as well as politics and technology the changing character of subjectivity in the age of the world picture the mythopoeic force of art and the uprooting of human beings As this volume shows interrogating Heidegger s thought has significant potential for both International Political Theory and also the analysis of specific concepts and dynamics in contemporary international studies such as the changing character of spatiality temporality and subjectivity **Forthcoming Books** Rose Arny,2002-02 **Books in Print** ,1991
