Rendezvous Frederik Pohl, 1985 How to Live Forever Stephen R L Clark, 2008-01-28 Immortality is a subject which has long been explored and imagined by science fiction writers In his intriguing new study Stephen R L Clark argues that the genre of science fiction writing allows investigation of philosophical questions about immortality without the constraints of academic philosophy He reveals how fantasy accounts of issues such as resurrection disembodied survival reincarnation and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth *How to Live Forever* is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work It includes extensive suggestions for further reading both fictional and philosophical and examines the work of such major science fiction authors as Arthur C Clarke Frank Herbert Larry Niven William Gibson and Colin Wilson **The Year's Best Science**

Landon, 2014-05-01 First published in 2003 Brooks Landon analyses science fiction not as a set of rules for writers but as a set of expectations for readers He presents science fiction as a social phenomenon that moves beyond literary experience through a sense of mission based on the belief that SF can be a tool to help you think He offers a broad overview of the genre and the stages through which it has developed in the twentieth century from the dime store novel through the New Wave of the 60s the cyberpunk 80s and soft agenda SF of the 90s The writers he examines range from E M Forster and John W Campbell to Philip K Dick and Ursula K Le Guin He also examines the large body of criticism now devoted to the genre and includes a bibliographic essay and a list of recommended titles
