

Popular Screens for Cognitive Impairment

Test Name	Brief Description	Validation	Scoring	Site	Comments
Allen Cognitive Level Screen (ACLS)	*The ACL is an Occupational Therapy test developed by Claudia Allen in the 1970s for individuals with mental health issues, but has been used for dementia patients more recently. *Individual completes a series of 3 leather lacing stitches that are progressively difficult in nature. While this is done, the therapist evaluates cognitive scores and scores the individual within a scoring system that has been aligned with the ACLs. At the same time, the Cognitive Performance Test is done, which focuses largely on IADL tasks. The 2 areas are combined for an ACL score. * The evaluator observes how the patient interacts with their environment	Unknown	Six Levels, ranging from: Level 6 - Independent to Level 1 - Totally Dependent Severe Cognitive Impairment Failure is considered to be in Level 3 or 2.	www.allen-cognitive-network.org	*ADLs and IADLs are considered * This is a test designed to assist with recommendations to the caregiver for development of a Plan of Care.
A Quick Test of Cognitive Speed (AQT)	*This test is to be used to screen for various types of dementia and other neurological disorders (in conjunction with CT scan or MRI). * AQT tasks measure: processing speed, cognitive shifts, working memory, parietal lobe dysfunction. The test takes approximately 3 minutes to administer.	Se = 93.1% Sp = 99.9%	*The clinical outcome measure is the time in seconds it takes to perform the test. *Typical findings of a cognitively impaired person are 2+ SD from the norm.	Elizabeth H. Wing, 2002 http://pearsonassess.com/health/culture/us-us/products/detail.htm?pid=015-0237-269	*This test is available for purchase from Pearson Assessment. Scoring results and other information are available from that source.
Alzheimer's Disease Assessment Scale - Cognitive (ADAS-cog)	* 11 part exam which takes 30 minutes to administer * Used as a primary outcome measuring tool in many drug trials *Considered to be a very good test of language and memory skills	Se = 89.19% Sp = 88.53 %	ADAS-Cog test cut-off score was 12. The score is adjusted for age and formal education.	Rosene WG, Mabe RC, Davis KL. A New Rating Scale for Alzheimer's Disease. <i>Am J Psychiatry</i>. 1984 Nov 1;141(11):1356-64.	Test takes too much time to be administered in the context of an Assessment, however, the results may be found in medical records when the patient is taking part in a drug trial.
Dementia Rating Scale (DRS)	*The DRS was developed to identify cognitive deficits in neurological disease and was originally developed for research on cerebral blood flow in dementia. * The test covers attention, perseveration, construction, conceptualization and memory. * The test is administered by a clinician and is a 36-item test, presented in hierarchical order starting with the most difficult.	Se= 95% at 123 Sp = 100	Scores range from 0 to 144. Normal = 136 + Mild AD = 103-130 Moderate AD 102 or below *Age and education level affect scoring	Steven Mattis , 1973 Mental Status Examination for Organic Mental Syndrome in the Elderly Patient. In Bellak, L and Karson, TB eds. <i>Geriatric Psychiatry</i>. New York, Grune and Stratton. 1976; 108-21.	*It was intended for use in severely affected institutionalized patients who could not complete more rigorous neuropsych testing. *The DRS is targeted to identify presenile and senile behaviors that correspond to stages in pre-school age development.
Enhanced Mental Skills Test (EMST)	The EMST is a test designed to detect cognitive loss at the earliest stages before Dementia- Mild Cognitive Impairment.	NA	NA	NA	*This test should not be used at claim time as it detects a VERY early stage of cognitive loss incongruent with LTCI Benefit Qualifiers.
Functional Activities Questionnaire (FAQ)	*The FAQ is not self-administered, but rather is completed by someone who knows the patient, such as the spouse, relative or close friend.	Various studies have been done finding ranges	Scores correlate with Lawton's IADL scale	Pfeiffer, R.T, Kurosaki, C, Harrah, J, Chance, and S. Filios, 1982	*Results can be influenced by the perception of the person completing the FAQ
