Now new owner Adobe is taking Flash and its powerful capabilities beyond the Web and making it a full fledged development environment. You'll find recipes that show you how to Detect the user's Flash Player version or their operating system. Build custom classes. Format dates and currency types. Work with strings. Build user interface components. Work with audio and video. Make remote procedure calls using Flash Remoting and web services. Load, send and search XML data. And much much more. Each code recipe presents the Problem, Solution and Discussion of how you can use it in other ways or personalize it for your own needs and why it works. You can quickly locate the recipe that most closely matches your situation and get the solution without reading the whole book to understand the underlying code. Solutions progress from short recipes for small problems to more complex scripts for thornier riddles and the discussions offer a deeper analysis for resolving similar issues in the future along with possible design choices and ramifications.
