Transforming Vision M. Jamie Ferreira,1991 The metaphor of a leap of faith is probably the element most widely recognized as a distinctive characteristic of a Kierkegaardian account of the transition to religious faith Both in popular and scholarly circles this leap has usually been understood in terms of an act of will power Challenging such a volitionalist view as well as some current alternatives to it which see instead only an ineffable miracle of grace Ferreira argues that Kierkegaard s striking appreciation of a variety of roles of imagination supports a reconceptualization of the leap or decision in terms of a reorienting shift in perspective an imaginative revisioning Exploring the relation between passion and paradox in several of Kierkegaard s accounts of selfhood and developing an account of transitional choice in which imagination is a constitutive element Ferreira elaborates an understanding of the faith transition in terms of such imaginative activities as suspension synthesis and engagement The analysis of imaginative activity in these ethical and religious transitions has moreover implications which go beyond Kierkegaard scholarship for it bears importantly not only on other conversion accounts but also on the question of transitions to alternative or incommensurable conceptual frameworks in general

Biblical Foundations for the Role of Healing in Evangelization Mathias D. Thelen,2017-12-07 It s almost undeniable that

God is working miracles of healing in evangelization today For theologians pastors and evangelists some questions arise What is the relationship between physical healing and the message of salvation Should the church really expect God to do healings in evangelization today Father Thelen answers these questions by examining the relationship between the preaching of the gospel and physical healing in the New Testament The gospel of Jesus Christ is not simply a message of fact it is a message of power that is often expressed through the working of deeds that serve as signs of the reality preached salvation As signs of the kingdom healings that accompany the preaching of the gospel play an indispensable role in bringing people to faith throughout the New Testament The result of this biblical study is a clarion call for the church to renew its faith in God's desire and power to confirm his word through healing As healing becomes more accepted and frequent in evangelization a Catholic biblical and theological approach to healing as it relates to evangelization an approach that can be different from its Protestant counterpart is necessary This modest book fits this need

The Stigmata in Medieval and Early Modern Europe Carolyn Muessig, 2020-02-06 Francis of Assisi's reported reception of the stigmata on Mount La Verna in 1224 is almost universally considered to be the first documented account of an individual miraculously and physically receiving the five wounds of Christ The early thirteenth century appearance of this miracle however is not as unexpected as it first seems Interpretations of Galatians 6:17 'I bear the marks of the Lord Jesus Christ in my body' had been circulating since the early Middle Ages in biblical commentaries These works perceived those with the stigmata as metaphorical representations of martyrs bearing the marks of persecution in order to spread the teaching of Christ in the face of resistance By the seventh century the meaning of Galatians 6:17 had been appropriated by bishops and priests as a sign or mark of Christ that they received invisibly at their ordination Priests and bishops came to be compared to soldiers of Christ who bore the brand stigmata of God on their bodies just like Roman soldiers who were branded with the name of their emperor By the early twelfth century crusaders were said to bear the actual marks of the passion in death and even sometimes as they entered into battle The Stigmata in Late Medieval and Early Modern Europe traces the birth and evolution of religious stigmata and particularly of stigmatic theology as understood through the ensemble of theological discussions and devotional practices Carolyn Muessig assesses the role stigmatics played in medieval and early modern religious culture and the way their contemporaries reacted to them The period studied covers the dominant discourse of stigmatic theology that is from Peter Damian's eleventh century theological writings to 1630 when the papacy officially recognised the authenticity of Catherine of Siena's stigmata
