**Architecture of Minoan Crete** John C. McEnroe, 2023-01-06 A comprehensive scholarly engaging look at the meanings behind key architectural designs of ancient Minoan culture Ever since Sir Arthur Evans first excavated at the site of the Palace at Knossos in the early twentieth century scholars and visitors have been drawn to the architecture of Bronze Age Crete Much of the attraction comes from the geographical and historical uniqueness of the island Equidistant from Europe the Middle East and Africa Minoan Crete is on the shifting conceptual border between East and West and chronologically suspended between history and prehistory In this culturally dynamic context architecture provided more than physical shelter it embodied meaning Architecture was a medium through which Minoans constructed their notions of social ethnic and historical identity the buildings tell us about how the Minoans saw themselves and how they wanted to be seen by others Architecture of Minoan Crete is the first comprehensive study of the entire range of Minoan architecture including houses palaces tombs and cities from 7000 BC to 1100 BC John C McEnroe synthesizes the vast literature on Minoan Crete with particular emphasis on the important discoveries of the past twenty years to provide an up to date account of Minoan architecture His accessible writing style skillful architectural drawings of houses and palaces site maps and color photographs make this book inviting for general readers and visitors to Crete as well as scholars

**Plain Pottery Traditions of the Eastern Mediterranean and Near East** Claudia Glatz, 2016-07-01 The evolution and proliferation of plain and predominantly wheel made pottery presents a characteristic feature of the societies of the Near East and Eastern Mediterranean since the fourth millennium B C This plain pottery has received little detailed archaeological attention in comparison to aesthetically more pleasing and chronologically sensitive decorated traditions Yet their simplicity and standardization suggest they are products of craft specialists the result of high volume production and therefore important in understanding the social systems in early complex societies This volume reevaluates the role and significance of plain pottery traditions from both historically specific perspectives and from a comparative point of view examines the uses and functions of this pottery in relation to social negotiation and group identity

**Making Ancient Cities** Andrew T. Creekmore, III, Kevin D. Fisher, 2014-04-28 This volume investigates how the structure and use of space developed and changed in cities and examines the role of different societal groups in shaping urbanism Culturally and chronologically diverse case studies provide a basis to examine recent theoretical and methodological shifts in the archaeology of ancient cities The book's primary goal is to examine how ancient cities were made by the people who lived in them The authors argue that there is a mutually constituting relationship between urban form and the actions and interactions of a plurality of individuals groups and institutions each with their own motivations and identities Space is therefore socially produced as these agents operate in multiple spheres

*The Evolution of Social Institutions* Dmitri M. Bondarenko, Stephen A. Kowalewski, David B. Small, 2020-09-12 This book presents a novel and innovative approach to the study of social evolution using case studies from the Old and the New World from prehistory to the present This approach is based on examining social evolution through the evolution of social institutions Evolution is defined as the process of structural change Within this framework the society or culture is seen as a system composed of a vast number of social institutions that are constantly interacting and changing As a result the structure of society as a whole is also evolving and changing The authors posit that the combination of evolving social institutions explains the non linear character of social evolution and that every society develops along its own pathway and pace Within this framework society should be seen as the result of the compound effect of the interactions of social institutions specific to it Further the transformation of social institutions and relations between them is taking place not only within individual societies but also globally as institutions may be trans societal and even institutions that operate in one society can arise as a reaction to trans societal trends and demands The book argues that it may be more productive to look at institutions even within a given society as being parts of trans societal systems of institutions since despite their interconnectedness societies still have boundaries which their members usually know and respect Accordingly the book is a must read for researchers and scholars in various disciplines who are interested in a better understanding of the origins history successes and failures of social institutions
