Ascension Steve Tomasula,2022-08-02 A visually stunning narrative of three eras in humankind s vexed relationship with nature Ascension is a novel about the end of nature or rather the end of three natures the time just before Darwin changed the natural world the 1980s just as the digital and genetic revolutions begin to replace nature with environment and today a time when we have the ability to manipulate nature at both the scale of the planet and at the genome The narrative follows three different biologists on the brink of each of these cultural extinctions to explore how nature occupies our imaginations and how our imaginations bring the natural world and our place in it into existence Ascension is a story of how we continually remake the world and are in turn remade by the new nature we ve created It is the story of humans yearning to understand their families themselves and the world they live in as it comes to a close leaving them to anticipate what will follow Rich in visual depictions of the natural world from nineteenth century engraving and paintings to twentieth century photography and twenty first century databases Ascension uses the materials of

three eras to drive home our inability to escape nature and the ways our fates are irrevocably bound together even as our actions usher in an end time
