Asian Security Practice Material And Ideational Influences:

Asian Security Practice Muthiah Alagappa, 2022 Despite the end of the Cold War security continues to be a critical concern of Asian states Allocations of state revenues to the security sector continue to be substantial and have in fact increased in several countries As Asian nations construct a new security architecture for the Asia Pacific region Asian security has received increased attention by the scholarly community But most of that scholarship has focused on specific issues or selected countries This book aims to lay the groundwork for a comprehensive in depth understanding of Asian security by investigating conceptions of security in sixteen Asian countries The book undertakes an ethnographic country by country study of how Asian states conceive of their security For each country it identifies and explains the security concerns and behavior of central decision makers asking who or what is to be protected against what potential threats and how security policies have changed over time This inside out or bottom up approach facilitates both identification of similarities and differences in the security thinking and practice of Asian countries and exploration of their consequences The crucial insights into the dynamics of international security in the region provided by this approach can form the basis for further inquiry including debates about the future of the region The book is in three parts Part I critically reviews and appraises the debate over defining security and provides a historical overview of international politics in Asia Part II investigates security practices in sixteen Asian countries the countries selected and grouped on the basis of security independence Based on the findings of the country studies and drawing on other published works Part III compares the national practices with a view to identifying and explaining key characteristics of Asian security practice and conceptualization on the basis of the Asian experiences

China Rising David C. Kang, 2010-01-22 Over the past three decades China has rapidly emerged as a major regional power yet East Asia has been more peaceful than at any time since the Opium Wars of 1839 1841 Why has the region accommodated China s rise David C Kang believes certain preferences and beliefs are responsible for maintaining stability in East Asia His research shows that East Asian states have grown closer to China with little evidence that the region is rupturing These states see China s rise as advantageous and are willing to defer judgment as to China s wishes and

future actions They believe that a strong China stabilizes East Asia while a weak China tempts other states to seek control of the region Kang's provocative work reveals the flaws in contemporary views on China and offers a new understanding of sound U.S. policy in East Asia

The Arms Race in Asia Andrew T.H. Tan, 2013-12-13 This book is the first systematic examination of the emerging arms race in Asia The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East the two largest arms export markets in the world Of these two regions Asia has become particularly significant led by the emergence of China and India as major powers It is therefore not surprising that the rapid military modernisation in Asia accompanied by significant increases in the size and sophistication of armed forces has generated attention as to its trends key characteristics causes and implications This phenomenon which has become evident since the end of the Cold War has also been widely described as an Asian arms race This book evaluates the key conceptual ideas which can shed light on this phenomenon as well as examining the complex mix of internal external and technological factors that have led to its emergence The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape a loose bloc of US allies in the region a counter bloc of potential US adversaries and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments The Arms Race in Asia concludes that if the emerging arms race is left unchecked it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars The book will be of great interest to students of Asian politics strategic studies defence studies security studies and IR in general

The Limits of Alignment John D. Ciorciari, 2010-08-16 The Limits of Alignment is an engaging and accessible study that explores how small states and middle powers of Southeast Asia ensure their security in a world where they are overshadowed by greater powers John D Ciorciari challenges a central concept in international relations theory that states respond to insecurity by either balancing against their principal foes bandwagoning with them or declaring themselves neutral Instead he shows that developing countries prefer limited alignments that steer between strict neutrality

and formal alliances to obtain the fruits of security cooperation without the perils of undue dependency Ciorciari also shows how structural and normative shifts following the end of the Cold War and the advent of U S primacy have increased the prevalence of limited alignments in the developing world and that these can often place constraints on U S foreign policy Finally he discusses how limited alignments in the developing world may affect the future course of international security as China and other rising powers gather influence on the world stage Security Aspects of Philippines-China Relations
