Sovereign Rules and the Politics of International Economic Law Marc Froese, 2018-03-20 How ought scholars and students to approach the rapidly expanding and highly multidisciplinary study of international economic law Academics in the field of international political economy used to take for granted that they worked with the overarching concepts of rules and governance while legal scholars analyzed treaties and doctrines However over the past twenty years formerly disparate fields of study have converged in a complex terrain where academic researchers and governmental policy analysts use a pluralistic set of theoretical and methodological tools to study the ongoing development of international economic law This volume argues that the extensive development of international economic law makes it impossible to discuss international political economy and international law as if they were mutually exclusive processes or even as if they were separate and mutually reinforcing Rather we must think of them as a deeply interconnected set of rapidly evolving activities This is a paradigm shift in which we cease to think about an international system in which politics and law interact and begin to think about an international system in which politics take place in a legal frame Froese terms this a shift from politics and law to the politics of international economic law This book does for political economy what others have already done for law introduces political scientists economists and other practitioners of IPE to the potential of engaging with legal theory and method it will be of great interest to scholars in a range of areas including IPE global governance IR and international law

Collective Consciousness and Gender

Alexandra Walker, 2018-08-22 This book explores collective consciousness and how it is applied to the pursuit of gender justice in international law It discusses how the collective mode of behaviour and identity can lead to unconscious role playing based on the social norms expectations or archetypes of a group Alexandra Walker contends that throughout history men have been constructed as archetypal dominators and women as victims In casting women in this way we have downplayed their pre existing innate capacities for strength leadership and power In casting men as archetypal dominators we have downplayed their capacities for nurturing care and empathy The author investigates the widespread implications of this unconscious role playing arguing that even in countries in which women have many of the same legal rights as men gender justice and equality have been too simplistically framed as feminism and women s rights and that giving women the rights of men has not created gender balance This book highlights the masculine and feminine traits belonging to all individuals and calls on international law to reflect this gender continuum
