Beyond The Brain On Science And The Origins Of Us:

Beyond the Brain Brian Capleton,2012-12 Beyond the Brain Igor M. Arieviditch,2017-08-24 The book outlines a fundamental alternative to the rising wave of aggressive biological reductionism and brainism in contemporary psychology and education It offers steps to achieving a daunting and elusive goal constructing a coherently non reductionist account of the mind The main obstacle to such a construction is identified as the centuries old contemplative fallacy that leads to entrenched dualisms and shackles major theoretical frameworks The alternative agentive activity perspective overcomes this fallacy by advancing the core principles of the cultural historical activity theory This innovative perspective charts a consistently non mentalist and non individualist view of psychological processes without discarding the individual mind A vast body of research and theories from Piaget and Dewey to sociocultural and embodied cognition approaches are critically engaged with a special focus on Piotr Galperin s contribution The notion of the embodied agent s object directed activity serves as a pivotal point for re conceptualizing the mind and its role in behavior In a radical departure from both the traditional mentalist and biologically reductionist frameworks psychological processes are understood as taking place beyond the brain as constituted by the agent s activities in the world From this standpoint many of Vygotsky s key insights including semiotic mediation internalization and cognitive tools are given a fresh scrutiny and substantially revised The agentive activity perspective opens ways to offer a bold vision for education developmental teaching and learning built on the premise that real knowledge is not information storage and retrieval and that education is not about knowledge transmission but instead it is about developing students minds

The History of the Brain and Mind Sciences Stephen T. Casper, Delia Gavrus,2017 This history explores the exceptionally complex scientific and medical techniques and practices that have allowed practitioners to claim expertise in the brain and mind sciences over the past two centuries Based on meticulous historical research essays in this volume reveal the richness of the history of the brain and mind sciences and show that this history cannot be reduced to an uncomplicated narrative of progressive discovery Rather the volume contributors collectively contend that it is in the seemingly obscure peripheral and marginal stories of the past that the medicine and science of the brain and the mind took shape

Mark, 2010 Our brains are getting wired differently in the world of digital technology information revolution and in the inter cultural world of global society Think of the new vocabulary Global brain collective intelligence global village and cyberspace That should tell us something about the neural rewiring that is taking place inside of our brains whether or not we are aware of it The fact that the human brain changes throughout a person's life in response to intellectual stimulation physical exercise exposure to new cultural environments learning opportunities and challenges is a revolutionary discovery Till twenty years ago neuroscientists believed in the conventional theory that the brain's ability at making new neural connections stopped before a child entered adolescence That is the old dogma There is a Second Copernican Revolution taking place inside of our brains writes the author quoting Carl Zimmer Some experts are suggesting that we are already living in what Richard Restack calls the neurosociety Ray Kurzweil the futurist is predicting that by 2045 A D human beings will be living in an era of singularity when non biological machines invented by human brains and human ingenuity are going to outsmart human intelligence billions of times What is going to be the fate of the human spirit human spirituality the feeling of connection to a force and power that is greater than us God our ability to use spiritual imagination and our intelligence Are we progressively moving away from religion and community based spirituality into the spirituality of different strokes for different folks In his groundbreaking book *Spiritual Intelligence and The Neuroplastic Brain* A Contextual Interpretation of Modern History Charles W Mark takes the reader on a journey through modern history and shows the glimpse of what is to come <http://www.spiritualityintelligence.com>
