Rockefeller, 2015-10-02 Surely you have heard the saying You are what you think This statement tells us in order to be an effective positive and motivating person we must embrace positivity in our thinking However until recent years it was not realized that this is more than just a good idea There are actually physical changes that take place in the human brain when we produce and act upon positive energy Affirmations allow us to rewire our brains With each positive affirmation we produce a hormonal change that actually raises our level of feel good neurons The more we exercise our brains in this manner the easier it becomes to empower ourselves When we affirm our visions and desires we are invested and enabled to make them our reality The following affirmations are the tools you need to change your world **Rewire Your Brain For Success** J.D. Rockefeller, 2015-12-19 If you are one of those who believe in the phrase You are what you think then you also

believe that your life is something that stems from the thoughts that you have. However, you cannot just purely rely on your thoughts. Instead, you need to translate your thoughts into words. Then eventually these words turn into actions for you to manifest your intentions. It means that you need to be extra careful with the words that come out of your mouth, choosing to say only those that will work towards your benefit and cultivate your highest good. The affirmations will be able to help you purify your thoughts and start restructuring the dynamic of your brain in order for you to really start thinking that there is nothing impossible in this world. Affirmation is a word that came from the Latin term *affirmare* that originally means to strengthen or make steady. The affirmations can really strengthen you by helping you believe in all the potentials of an action that you would like to manifest. Every time you verbally affirm your ambitions and dreams, you are instantly empowered with a deeper sense of reassurance that your wishful words will turn into reality. Affirmations are the proven and tested methods of self-improvements due to their ability to rewire your brain. Similar with exercise, these can raise the level of the feel-good hormones and push your brains into forming brand new clusters of positive thought. As far as the sequence of thought, speech, and action is concerned, the affirmations play a crucial role through breaking the patterns of negative thoughts, the negative speech, and ultimately negative actions.

[How To Think Positively and Achieve Success](#) James David Rockefeller, Positive thinking has become a popular concept these days. Everyone is reading or writing about it or trying out techniques to change from a negative to a positive person. Of course, there is good reason for it. It makes you someone who is not afraid to take calculated risks to achieve what they want to. In general, positive thinking can bring about a massive change in your emotional, physical, mental, and social life. So what exactly is positive thinking? Can it really help you? How do you become a positive person? How do you know whether your thinking is positive or negative? How can you stop your negative thoughts? What if they come back? How do you replace your negative thoughts with positive ones? How do you ensure that you continue living life on the positive track? What advantages can you get from being positive? Can anyone become positive? Find out the answers to these questions in this book.
