Agent Intelligence Through Data Mining Multiagent Systems Artificial Societies And Simulated Organizations:

Agent Intelligence Through Data Mining Andreas L. Symeonidis, Pericles A. Mitkas, 2005-07-15 This book addresses the use of data mining for smarter more efficient agents as well as the challenge of generating intelligence from data while transferring it to a separate possibly autonomous software entity Following a brief review of data mining and agent technology fields the book presents a methodology for developing multi agent systems describes available open source tools and demonstrates the application of the methodology on three different cases

Agent Intelligence Through Data Mining Andreas L. Symeonidis, Pericles A. Mitkas, 2006-05-06 Knowledge hidden in voluminous data repositories routinely created and maintained by today s applications can be extracted by data mining The next step is to transform this discovered knowledge into the inference mechanisms or simply the behavior of agents and multi agent systems Agent Intelligence Through Data Mining addresses this issue as well as the arguable challenge of generating intelligence from data while transferring it to a separate possibly autonomous software entity This book contains a methodology tools and techniques and several examples of agent based applications developed with this approach This volume focuses mainly on the use of data mining for smarter more efficient agents Agent Intelligence Through Data Mining is designed for a professional audience of researchers and practitioners in industry This book is also suitable for graduate level students in computer science

Data Mining and Multi-agent Integration Longbing Cao, 2009-07-25 Data Mining and Multi agent Integration aims to re ect state of the art research and development of agent mining interaction and integration for short agent min ing The book was motivated by increasing interest and work in the agents data min ing and vice versa The interaction and integration comes about from the intrinsic challenges faced by agent technology and data mining respectively for instance multi agent systems face the problem of enhancing agent learning capability and avoiding the uncertainty of self organization and intelligence emergence Data min ing if integrated into agent systems can greatly enhance the learning skills of agents and assist agents with predication of future states thus initiating follow up action or intervention The data mining community is now struggling with mining distributed interactive and heterogeneous data sources Agents can be used to man age such data sources for data access monitoring integration and pattern merging from the infrastructure gateway message passing and pattern delivery perspectives These two examples illustrate the potential of agent mining in handling challenges in respective communities There is an excellent opportunity to create innovative dual agent mining interac tion and integration technology tools and systems which will deliver results in one new technology

Multi-Agent Programming Rafael H. Bordini, Mehdi Dastani, Jürgen Dix, Amal El Fallah Seghrouchni, 2005-11-21 Multi Agent Programming is an essential reference for anyone interested in the most up to date developments in MAS programming While previous research has focused on the development of formal and informal approaches to analyze and specify Multi Agent Systems this book focuses on the development of programming languages and tools which not only support MAS programming but also implement key

concepts of MAS in a unified framework Part I describes approaches that rely on computational logic or process algebra Jason 3APL IMPACT and CLAIM SyMPA Part II presents languages and platforms that extend or are based on Java JADE Jadex and JACKTM Part III provides two significant industry specific applications The DEFACTO System for coordinating human agent teams for disaster response and the ARTIMIS rational dialogue agent technology Also featured are seven appendices for quick reference and comparison **Agents and Data Mining Interaction** Longbing Cao,Ana L.C.

Bazzan,Andreas L. Symeonidis,Vladimir Gorodetsky,Gerhard Weiss,Philip S. Yu,2012-01-09 This book constitutes the thoroughly refereed post workshop proceedings of the 7th International Workshop on Agents and Data Mining Interaction ADMI 2011 held in Taipei Taiwan in May 2011 in conjunction with AAMAS 2011 the 10th International Joint Conference on Autonomous Agents and Multiagent Systems The 11 revised full papers presented were carefully reviewed and selected from 24 submissions The papers are organized in topical sections on agents for data mining data mining for agents and agent mining applications **Distributed Networks** Qurban A. Memon,2017-12-19 For many civilian security and military

applications distributed and networked coordination offers a more promising alternative to centralized command and control in terms of scalability flexibility and robustness It also introduces its own challenges Distributed Networks Intelligence Security and Applications brings together scientific research in distributed network intelligence security and novel applications The book presents recent trends and advances in the theory and applications of network intelligence and helps you understand how to successfully incorporate them into distributed systems and services Featuring contributions by leading scholars and experts from around the world this collection covers Approaches for distributed network intelligence Distributed models for distributed enterprises including forecasting and performance measurement models Security applications for distributed enterprises including intrusion tackling and peer to peer traffic detection Future wireless networking scenarios including the use of software sensors instead of hardware sensors Emerging enterprise applications and trends such as the smartOR standard and innovative concepts for human machine interaction in the operating room Several chapters use a tutorial style to emphasize the development process behind complex distributed networked systems and services which highlights the difficulties of knowledge engineering of such systems Delving into novel concepts theories and advanced technologies this book offers inspiration for further research and development in distributed computing and networking especially related to security solutions for distributed environments Information Systems: Methods, Models,

and Applications Heinrich C. Mayr,Christian Kop,Stephen Liddle,Athula Ginige,2013-06-17 This volume constitutes the proceedings of the 4th International United Information Systems Conference UNISCON 2012 which was held in Yalta Ukraine during June 1 3 2012 UNISCON 2012 was affiliated with the 8th International Conference on ICT in Education Research and Industrial Applications ICTERI 2012 The 14 full papers four short papers and three extended abstracts presented with a keynote speech were carefully reviewed and selected from 96 submissions The topical sections covered are

data management applications modeling and semantics and social issues in information systems **Advanced Methods and Technologies for Agent and Multi-Agent Systems** D. Barbucha, M.T. Le, R.J. Howlett, 2013-05-14 The field of agent and multi agent systems is concerned with the development and evaluation of sophisticated AI based problem solving and control architectures for both single and multi agent systems This book presents the proceedings of the 7th KES Conference on Agent and Multi agent Systems Technologies and Applications KES AMSTA 2013 held in Hue City Vietnam in May 2013 The KES AMSTA 2013 conference provides an internationally respected forum for scientific research in the technologies and applications of agent and multi agent systems In all 44 papers were selected for oral presentation and publication in this volume Special attention is paid to the feature topics of intelligent technologies and applications in the area of e health social networking self organizing systems economics and trust management Other topics covered include agent oriented software engineering beliefs engineering desires and intentions representation agent cooperation coordination negotiation organization and communication distributed problem solving specification of agent communication languages formalization of ontologies and conversational agents The book highlights new trends and challenges in agent and multi agent research and will be of interest to the research community working in the fields of artificial intelligence collective computational intelligence robotics dialogue systems and in particular agent and multi agent systems technologies and applications

Media Convergence Handbook - Vol. 1 Artur Lugmayr, Cinzia Dal Zotto, 2015-11-20 The Media Convergence Handbook sheds new light on the complexity of media convergence and the related business challenges Approaching the topic from a managerial technological as well as end consumer perspective it acts as a reference book and educational resource in the field Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools However it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account Media consumers content producers and managers face different challenges in the process of media convergence Volume I of the Media Convergence Handbook encourages an active discourse on media convergence by introducing the concept through general perspective articles and addressing the real world challenges of conversion in the publishing broadcasting and social media sectors

Process-Oriented Analysis and Validation of Multi-Agent-Based Simulations Nicolas Denz, 2014-12-31 In multi agent based simulation MABS the behavior of individual actors is modeled in detail The analysis and validation of these models is rated as difficult and requires support by innovative techniques and tools Problems include model complexity the amount and often qualitative representation of simulation results and the typical dichotomy between microscopic modeling and macroscopic observation perspectives In recent years data mining has been increasingly applied as a support technique in this context A particularly promising approach is found in the field of process mining Due to its rooting in business process analysis process mining shares several process and organization oriented analysis perspectives and use cases with agent

based modeling This thesis proposes a conceptual framework for the systematic application of process mining to the analysis and validation of MABS As a foundation agent oriented analysis perspectives and simulation specific use cases are identified and complemented with methods techniques and results from the literature A partial formalization of perspectives and use cases is sketched by utilizing concepts from process modeling and software engineering Beyond the conceptual work process mining is applied in two case studies related to different modeling and simulation approaches
