All About Mammals

What are mammals?

A mammal is an animal that has bones and hair. They drink milk from their mother when they are young.

There are still different kinds of mammals found across the world. They can be as small as a mouse or insect, or as large as an elephant or the whale. Humans are also a kind of mammal.

Mammals are warm-blooded. This means that their body stays warm and will stay the same temperature in warm and cold places. In cold places, they need to eat more food so they can use more energy to keep their body warm.

Where do mammals live?

Mammals are found all over the world. Most mammals live on the ground, in trees or under the ground. Some mammals, like otters and seals, can live both in the water and on land. A few mammals, like whales, live only in water.
