Aggregation Functions Michel Grabisch,2009-07-09 A rigorous and self contained exposition of aggregation functions and their properties

Aggregation Functions Michel Grabisch,Jean-Luc Marichal,Radko Mesiar,Endre Pap,2009-07-09 Aggregation is the process of combining several numerical values into a single representative value and an aggregation function performs this operation These functions arise wherever aggregating information is important applied and pure mathematics probability statistics decision theory functional equations operations research computer science and many applied fields economics and finance pattern recognition and image processing data fusion etc This is a comprehensive rigorous and self contained exposition of aggregation functions Classes of aggregation functions covered include triangular norms and conorms copulas means and averages and those based on nonadditive integrals The properties of each method as well as their interpretation and analysis are studied in depth together with construction methods and practical identification methods Special attention is given to the nature of scales on which values to be aggregated are defined ordinal interval ratio bipolar It is an ideal introduction for graduate students and a unique resource for researchers [Eurofuse 2011](#) Bernard De Baets,János Fodor,Carlos Serodio,Pedro Couto,Pedro Melo-Pinto,2011-09-25 This carefully edited book comprises the papers from EUROFUSE 2011 Workshop on Fuzzy Methods for Knowledge based Systems EUROFUSE was established in 1998 as the EURO the Association of European Operational Research Societies Working Group on Fuzzy Sets as a successor of the former European Chapter of IFSA the International Fuzzy Systems Association The present EUROFUSE 2011 workshop is held at R gua Portugal 21 23 September in the World Heritage Site of the Douro Wine Region and is organised by Pedro Melo Pinto and Pedro Couto The workshop is devoted to Fuzzy Methods for Knowledge based Systems And has the goal to bring together researchers and practitioners developing and applying fuzzy techniques in preference modelling and decision making in an informal atmosphere EUROFUSE 2011 has three distinguished invited speakers Francisco Herrera Granada Spain Radko Mesiar Bratislava Slovakia and Jose Luis Garcia Lapresta Valladolid Spain Next to the invited speakers the three day program consists of 37 lectures In total there are 70 participants from 10 countries This edited volume contains the final revised manuscripts on the basis of which the program was put together **Pythagorean Fuzzy Sets** Harish Garg,2021-07-22 This book presents a collection of recent research on topics related to Pythagorean fuzzy set dealing with dynamic and complex decision making problems It discusses a wide range of theoretical and practical information to the latest research on Pythagorean fuzzy sets allowing readers to gain an extensive understanding of both fundamentals and applications It aims at solving various decision making problems such as medical diagnosis pattern recognition construction problems technology selection and more under the Pythagorean fuzzy environment making it of much value to students researchers and professionals associated with the field **Intelligent Systems: Models and Applications** Endre Pap,2012-10-20 The theory and applications of intelligent systems is today an important field of research This book is an up

to date collection of seventeen chapters written by recognized experts in the field In an introductory mathematical foundations part an overview of generalizations of the integral inequalities for nonadditive integrals and a construction of the General Prioritized Fuzzy Satisfaction Problem is given Then different aspects of robotics are presented such as the differences between human beings and robots the motion of bipedal humanoid robots and an evaluation of different autonomous quadrotor flight controllers Also Fuzzy Systems are presented by a model of basic planar imprecise geometric objects allowing various applications in image analysis GIS and robotics as well as a type 2 fuzzy logic in a software library for developing perceptual computers and a two degree of freedom speed control solutions for a brushless Direct Current motor The book also presents recent applications in medicine such as a Virtual Doctor System methods for a face to face human machine interaction and an emotion estimation with applications for multiple diseases and the effect of the applied therapy The last part of the book covers different applications in transportation network monitoring and localization of pedestrians in images
