Inhalation Anesthetics Klaus Peter, Burnell R. Brown, Eike Martin, Olof Norlander, 2012-12-06 In 1981 the Institute of Anesthesiology at the Ludwig Maximilian University of Munich organized a first international symposium on inhalation anesthetics In 1982 the most important contributions were published in the series Anaesthesiology and Intensive Care Medicine At that time the interest of European anesthesiologists was focused on isoflurane which had just been introduced for clinical purposes Studies on this product had already been appearing for years in the American literature This book deals once more with all three inhalation anesthetics but places particular emphasis on isoflurane In contrast to the situation in 1981 extensive experimental and clinical investigations on isoflurane have by now become available in the European literature From its conception the objective of this symposium was not to discuss the relative value of inhalation anesthesia balanced anesthesia as compared with intravenous anesthesia On the contrary the major effects and interactions of isoflurane were to be explored The side effects and their relative significance in different patient groups were also of interest Current knowledge concerning a range of topics related to inhalation anesthetics especially isoflurane was to be presented in a comprehensive and critical manner The effects of isoflurane on the cardiovascular system were the focus of interest during the symposium and are accordingly dealt with extensively in this volume The comparative effects on coronary perfusion of isoflurane enflurane and halothane are described in detail
