*Medieval Women and Their Objects* Jennifer Adams, Nancy Bradbury, 2021-03-11 The essays gathered in this volume present multifaceted considerations of the intersection of objects and gender within the cultural contexts of late medieval France and England Some take a material view of objects showing buildings books and pictures as sites of gender negotiation and resistance and as extensions of women s bodies Others reconsider the concept of objectification in the lives of fictional and historical medieval women by looking closely at their relation to gendered material objects taken literally as women s possessions and as figurative manifestations of their desires The opening section looks at how medieval authors imagined fictional and legendary women using particular objects in ways that reinforce or challenge gender roles These women bring objects into the orbit of gender identity employing and relating to them in a literal sense while also taking advantage of their symbolic meanings The second section focuses on the use of texts both as objects in their own right and as mechanisms by which other objects are defined The possessors of objects in these essays lived in the world their lives documented by historical records yet like their fictional and legendary counterparts they too used objects for instrumental ends and with symbolic resonances The final section considers the objectification of medieval women s bodies as well as its limits While this at times seems to allow for a trade in women authorial attempts to give definitive shapes and boundaries to women s bodies either complicate the gender boundaries they try to contain or reduce gender to an ideological abstraction This volume contributes to the ongoing effort to calibrate female agency in the late Middle Ages honoring the groundbreaking work of Carolyn P Collette *The Oxford Handbook of Early Christian Archaeology* David K. Pettegrew, William Rodney Caraher, Thomas W. Davis, 2019 This handbook brings together work by leading scholars of the archaeology of early Christianity in the Mediterranean and surrounding regions The 34 essays to this volume ground the history culture and society of the first seven centuries of Christianity in the latest currents of archaeological method theory and research

*Ecologies of Inception* Simone Ferracina, 2022-05-30 Responding to increasing levels of planetary pollution waste generation carbon dioxide emission and environmental collapse *Ecologies of Inception* re thinks potentiality an object s

ability to change in architecture and design The book problematizes the still prevailing modern paradigm of design practice the technical tabula rasa a tendency to begin from scratch and use raw amorphous and obedient materials that can be easily and effectively manipulated facilitating a seamless and faithful embodiment of intentions Instead the philosophy of design developed in the text prompts through a variety of case studies thinkers and disciplines a collective reconsideration of value dissociating it from the projects and signatures of any one author or generation Whereas the merits of up cycling and circular design are canonically defined vis vis status quo economic and socio cultural orthodoxies this project unpacks the theoretical assumptions that underpin these practices showing that they perpetuate the same biases and exclusions that generate waste in the first place As an alternative the book introduces a nodal and exaptive paradigm for design a conceptual and methodological toolset for engaging the durational and anthropocenic materiality of the third millennium and for radically prioritizing practices of maintenance reuse care and co option This approach which is inspired by and builds upon evolutionary biology technological disobedience queer use adaptive reuse experimental preservation and improvisational practices such as collage adhocism bricolage and kit bashing refuses to reduce pre existing material substrates to abstract lists of properties or featureless lumps encountering them on their own terms as situated individuals and co authors Ecologies of Inception will appeal to undergraduate and postgraduate students educators and professional architects and designers interested in sustainable design and seeking to develop conceptual and design tools commensurate with the magnitude and urgency of the climate emergency

**Anglo-Saxon Literary Landscapes** Heide Estes, 2025-10-01 Literary scholars have traditionally understood landscapes whether natural or manmade as metaphors for humanity instead of concrete settings for people s actions This book accepts the natural world as such by investigating how Anglo Saxons interacted with and conceived of their lived environments Examining Old English poems such as Beowulf and Judith as well as descriptions of natural events from the Anglo Saxon Chronicle and other documentary texts Heide Estes shows that Anglo Saxon ideologies which view nature as diametrically opposed to humans and the natural world as designed for human use have become deeply embedded in our cultural heritage language and more

*Unbecoming Human* Cimatti Felice Cimatti, 2020-03-02 The animality of human beings is completely unknown Being human means to be something other than an animal to not be an animal Felice Cimatti with reference to the work of Gilles Deleuze explores what human animality looks like He shows that becoming animal means to stop thinking of humanity as the reference point of nature and the world It means that our value as humans has the very same value as a cloud a rock or a spider Drawing on a wide range of texts from philosophical ethology to classical texts to continental philosophy and literature Cimatti creates a dialogue with Flaubert Derrida Temple Grandin Heidegger as well as Malaparte and Landolfi as part of this intriguing discussion about our humanity and our unknown animality

*The Shakespearean International Yearbook* Tiffany Werth, 2017-05-15 This eighth volume of The Shakespearean International Yearbook presents a special section on European Shakespeares proceeding from

the claim that Shakespeare's literary craft was not just native English or British but was filtered and fashioned through a Renaissance awareness that needs to be recognized as European and that has had effects and afterlives across the Continent. Guest editors Ton Hoenselaars and Clara Calvo have constructed this section to highlight both how the spread of Shakespeare throughout Europe has brought together the energies of a wide variety of European cultures across several centuries and how the inclusion of Shakespeare in European culture has been not only a European but also a world affair. The Shakespearean International Yearbook continues to provide an annual survey of important issues and developments in contemporary Shakespeare studies. Contributors to this issue come from the US and the UK, Spain, Switzerland, and South Africa, Canada, The Netherlands, India, Portugal, Greece, France, and Hungary. In addition to the section on European Shakespeares, this volume includes essays on the genre of romance, issues of character, and other topics.
