

# Ecology Habitable Planet Lab

**Purpose:** To examine the interrelationships between organisms in the environment.

## Directions:

1. Read ALL instructions and the introduction section BEFORE doing the lab.
2. Go to: <http://www.habitableplanet.com/interactivity/eco/ecology/ecology.html>
3. Click on "Open Simulator"
4. Complete this document as you manipulate the simulation as directed.

## Lesson 1: The Producers

Step 1 Challenge: Try to get two plant species to coexist.

### Instructions:

1. Imagine the ecosystem is newly forming—the previous ecosystem has been destroyed by fire or flood—and the first colonizers of the successive ecosystem are, of course, producers. Plant A was the most common species this might be because it's tougher, grows quickly, can handle tough conditions, or can live with less food and water.
2. Given the two fictitious species of plants in the simulator,
  - a. Predict what will happen to the population of each species in this young system and record your prediction in the Data Table.
  - b. Then run the simulator for 100 days and record the population numbers for both plants.

|                     | Plant A | Plant B |
|---------------------|---------|---------|
| Predictions         | 7000    | 12500   |
| Starting Population | 5000    | 5000    |
| Ending Population   | 10000   | 0       |

- c. Take a screenshot of the completed graph.
3. Answer the following:
