

1. Biology is defined as the study of life.
2. A hypothesis is a suggested explanation for an event, which one can test, while a theory is a tested and confirmed explanation for observations or phenomena.
3. Some scholars divide the natural sciences into the life sciences and the physical sciences.
4. What is the difference between inductive and deductive reasoning?

The difference between inductive and deductive reasoning is one uses related observations to make a conclusion and the other uses a law or principle to determine a result.

5. Discovery science is usually inductive, whereas hypothesis-based science is usually deductive.
6. List the steps of the scientific method:

Observation (a problem to solve) = question

7. A valid hypothesis must be testable and falsifiable.
8. What is the purpose of a control group when testing a hypothesis?
The control group contains every feature of the experimental group except it is not given the manipulation that the researcher hypothesizes.
