American Injustice John Paul Mac Isaac, 2022-11-22 This is the story of how I tried to get the Hunter Biden laptop evidence to the authorities My life changed forever on April 12 2019 when Hunter Biden stumbled into my shop requesting data recovery from one of his liquid damaged laptops After his father announced his candidacy for president of the United States and Hunter failed to pay for and collect his computer fear for my safety grew There was paperwork in Hunter's possession giving me permission to examine and copy his data someone was going to come looking for the laptop and come looking for me Concerned that I was sitting on evidence in a criminal investigation I set out to hand everything over to the FBI But feeling betrayed by the FBI's inaction in providing the laptop as evidence during the impeachment trial I then turned to Congress and ultimately to a lawyer for the president Rudy Giuliani When the story broke Big Tech and social and mainstream media blocked the reporting I was instantly labeled as a hacker and a criminal My actions were labeled Russian disinformation and it didn't take long before people started attacking my business and my character forcing me to close my shop and flee the state

The Corporation and the Twentieth Century

Richard N. Langlois, 2023-06-27

Over the course of most of the twentieth century new technologies drove increasing diversification and specialization within the economy

Du Pont for example which invented nylon during the Depression managed the complexity of widespread diversification by pioneering the decentralized multidivisional organizational structure which was almost universally adopted in large American firms after World War II

Whereas in the nineteenth century there had been just a handful of employees at their Wilmington headquarters by 1972 there were perhaps 10 000 managers inhabiting a vast complex at the same location

The conventional wisdom is that this huge trend withdrew large swaths of the American economy from the realm of the free market and entrusted them to a new class of professional managers who had at their disposal increasingly powerful scientific methods of accounting and forecasting

It was the superior ministrations of these managers apparently not relative prices that equilibrated supply and demand and made sure that goods flowed smoothly from raw materials to the final consumer

Economic historian Richard Langlois argues that it wasn't so simple

The Corporation and the Twentieth Century is an accessible account of American business enterprise and administrative planning looking at both the rise and demise of managerial coordination and the history of antitrust policy in this context

Offering an authoritative counterpoint to Alfred Chandler's classic *The Visible Hand* Langlois shows how historic events in the twentieth century came together to drastically change the organization of American businesses

Contrary to the beliefs of some business historians he maintains that large managerial corporations arose not because of their superiority but as a result of systematic technological changes and larger historic forces and that post war events such as the Vietnam War and the fall of Bretton Woods culminated in the resurgence of market coordination in the institutional innovations of deregulation and in the creation of decentralized new technology

Controversially Langlois argues that those antitrust policies viewed as successes in the past are in fact failures and holds that there was never a period during which antitrust kept size concentration or
