Australian Universities:

Australian Universities Dr Julia Horne, Dr Matthew A.M. Thomas, 2022-12-01 *Australian Universities* A conversation about public good highlights contemporary challenges facing Australian universities and offers new ideas for expanding public good More than 20 experts take up the debate about our public universities who they are for what their mission is or should be what strong higher education policy entails and how to cultivate a robust and constructive relationship between government and Australian universities Issues covered include How to change a culture of exclusion to ensure all are welcome in universities especially Aboriginal and Torres Strait Islander students as well as those from low socio economic backgrounds How educational disadvantage in Australia often begins in school and is still the major barrier to full university participation The reality that funding for research and major infrastructure requires significant additional funds from non government sources e.g international student fees A lack of policy recognition that international university students increase Australia's social cultural and economic capital Pathways to making policy decisions wide ranging consultative inclusive and inspired rather than politically partisan and ideologically driven The impact of COVID 19 on universities and particularly how the pandemic and governmental responses exacerbated extant and emerging issues *Australian Universities* rekindles a much needed conversation about the vital role of public universities in our society arguing for initiatives informed by the realities of university life and offering a way forward for government communities students and public universities together to advance public good

ePortfolios in Australian Universities Jennifer Rowley, 2016-09-14 This book focuses on essential findings concerning emerging practices of student learning through the teaching and learning benefits of the electronic portfolio ePortfolio in a range of disciplines at Australian universities It explores the latest research on ePortfolios teaching quality future research directions for tertiary learning and teaching institutional agendas in higher education and the role that the ePortfolios can play in supporting improvements in pedagogic practice and student outcomes Included in these agendas is research into the development of higher education through the technologising of pedagogy learner identities in discrete disciplines and the praxis of individual university teachers The book covers accounts of academic learning success and challenges across current higher education subject areas By presenting case study accounts of ePortfolio use it reveals the importance of defining and documenting how we can meaningfully develop learner portfolios in research teaching and learning at Australian universities With an intentional research base the book draws on work conducted inside and outside Australia and highlights how the ePortfolio can help tertiary staff prepare for the impact of a student created portfolio on teaching learning and subsequent academic scholarship

Indigenous Early Career Researchers in Australian Universities Michelle Trudgett, Susan Page, Rhonda Povey, Michelle Locke, 2024-12-07 This open access book explores the key barriers and facilitators to advancing meaningful and fulfilling academic careers in the higher education sector for Australian Indigenous doctoral graduates It focuses on the career trajectories of Indigenous early career researchers who

have participated in the Developing Indigenous Australian Early Career Researchers study funded by the Australian Research Council ARC It delves into a deeper understanding of the professional development requirements of Indigenous Early Career Research academics and presents a new set of knowledge which incorporates Indigenous standpoints thus creating new avenues for Indigenous early career researchers to articulate their living experiences and perspectives for the benefit of their colleagues in the present and the future This book also provides a model of best practice collaborative approach through its methodology method and structural design The various chapters present first hand experience with an Indigenous methodological approach including access to respectful use of culturally appropriate terminology modelled by the authors and carefully footnoted with explanatory notes Its writing is also guided by ethical principles concerning Indigenous Intellectual Property Rights This book serves as a compendium of critique for current and future Indigenous early career researchers as well as an encouragement for mentors and advocates for equity and parity for Indigenous academics in higher education Through the voices of Indigenous early career researchers this book positions universities well to facilitate improved Indigenous outcomes and to continue to pursue educational equity within the higher education sector *The Corporatization and Environmental Sustainability of Australian Universities* Hans Baer, 2023-11-08 Analysing the juxtaposition of two trends in universities corporatisation and environmental sustainability this book explores how they are more contradictory than compatible Hans A Baer argues that this contradiction is unavoidable because of the capitalist parameters in which they operate including a commitment to on going economic growth which contributes to social inequality environmental degradation and greenhouse gas emissions Drawing on archival sources and Baer s experiences in university sustainability forums the book exposes how what universities claim to do in relation to environmental sustainability compares with their research educational operational and institutional activities Presenting a critique of and a radical alternative to the status quo this book is suitable for academics and students of anthropology environmental studies and higher education

Australian National Bibliography: 1992 National Library of Australia, 1988 **APAIS 1991:** **Australian public affairs information service** , **Australian National Bibliography** , 1978 **Australian Idea of a University** Glyn Davis, 2017-11-10 Universities like other industries are challenged by disruptive market forces Today there are nearly forty public universities in Australia Some predict that by 2070 there may be only ten institutions left globally to deliver higher education Relentless inventiveness and entrepreneurial agendas promise students a world of unbounded study options In this powerful meditation on the need for institutional diversity Glyn Davis argues that experimentation innovation and resilience are the only way the public university will endure **APAIS 1999: Australian public affairs information service** , *A History of the Modern Australian University* Hannah Forsyth, 2014-10-01 In 1857 all of the Arts students at the University of Sydney could fit into a single photograph Now there are more than one million university students in Australia After World War II Australian universities became less elite but more important growing from six small institutions

educating less than 0.2 per cent of the population to a system enrolling over a quarter of high school graduates. And yet universities today are plagued with ingrained problems. More than 50 per cent of the cost of universities goes to just running them. They now have an explicit commercial focus. They compete bitterly for students and funding, an issue sharply underlined by the latest federal budget. Scholars rarely feel their vice-chancellors represent them, and within their own ranks academics squabble for scraps. *Knowing Australia* is a perceptive, clear-eyed account of Australian universities recounting their history from the 1850s to the present. Investigating the changing nature of higher education, it asks whether this success is likely to continue in the 21st century as the university's hold over knowledge grows ever more tenuous.
