research in fourteen service industries Heskett Sasser and Hart show exactly what enables one or two companies in each industry to constantly set new standards for quality and value that force competitors to adapt or fail At the heart of breakthrough performance the authors contend is a sometimes intuitive but thorough understanding of the self reinforcing service cycle that replaces traditional management of trade offs The cycle is a paradigm derived from the research results suggesting direct links between heightened customer satisfaction increased customer retention augmented sales and profit improved quality and productivity greater service value per unit of cost improved satisfaction of service providers increased employee retention and further heightened customer satisfaction With detailed examples and dramatic case studies of Mark Twain Bancshares American Airlines Florida Power and Light Federal Express McDonald s and many other companies Heskett Sasser and Hart show how this self reinforcing cycle of behavior differentiates breakthrough leaders from their merely good competitors The authors describe how breakthrough managers develop counterintuitive even contrarian strategic service visions These companies define their service concept in terms of results achieved for customers rather than services performed They target market segments by focusing on psychographics how customers think and behave instead of demographics And instead of viewing a service delivery system as a facility where the service is produced and sold breakthrough firms see it as an opportunity to enhance the quality of the service These profound differences in thought and action have brought spectacular results For managers who wish to set the pace in their service industries *Service Breakthroughs* is essential reading
