The Palgrave Handbook of Adult Mental Health Michelle O'Reilly, Jessica Nina

Lester, 2016-04-08 This Handbook gathers together empirical and theoretical chapters from leading scholars and clinicians to examine the broad issue of adult mental health. The contributors draw upon data from a variety of contexts to illustrate the multiple ways in which language as action can assist us in better understanding the discursive practices that surround adult mental health. Conversation and discourse analysis are useful related approaches for the study of mental health conditions particularly when underpinned by a social constructionist framework. In the field of mental health the use of these two approaches is growing with emergent implications for adults with mental health conditions, their practitioners and/or their families. Divided into four parts: Reconceptualising Mental Health and Illness; Naming, Labelling and Diagnosing; The Discursive Practice of Psychiatry and Therapy; and Interventions, this Handbook provides a comprehensive overview of current debates regarding adult mental health.

Interventions in Health Care Interaction Petra Snejder, Annette

Klarenbeek, 2024-07-09 This edited collection presents the latest work on the application of discursive psychology and conversation analysis to sensitive interactions and interventions in healthcare. While all interactions in healthcare settings can be challenging for both patients and practitioners, this book pays particular attention to topics that are likely to be especially sensitive, such as communication around sexual health, palliative care, suicide prevention, medically unexplained symptoms, or chronic pain. Across nine chapters, authors discuss how discursive psychology and conversation analysis can help us understand what people actually do in conversations, hence providing a strong basis for developing and testing training methods that support health professionals to reflect on their interactions with patients. Addressing both practical and theoretical challenges in the development and implementation of such training sessions, this volume establishes the state of the art in this area and offers a valuable tool for academics and researchers in discourse analytical fields, practitioners working to improve communication in health, as well as meeting facilitators in education or work settings related to healthcare.
