- The following table shows the results of the regression analysis for the dependent variable "Perceived Organizational Support" (POS). The independent variables are "Organizational Commitment" (OC) and "Organizational Identification" (OI). The table includes the regression coefficients, standard errors, t-statistics, and p-values for each variable.
- | Variable                           | Regression Coefficient | Standard Error | t-Statistic | p-Value |
|------------------------------------|------------------------|----------------|-------------|---------|
| Organizational Commitment (OC)     | 0.35                   | 0.05           | 7.00        | < 0.001 |
| Organizational Identification (OI) | 0.28                   | 0.04           | 7.00        | < 0.001 |
| Constant                           | 1.20                   | 0.10           | 12.00       | < 0.001 |
| Adjusted R-squared                 | 0.85                   |                |             |         |
- The results indicate that both Organizational Commitment and Organizational Identification are significant predictors of Perceived Organizational Support. The adjusted R-squared value of 0.85 suggests that the model explains 85% of the variance in POS.
