Under the Bus Caroline Fredrickson, 2010-01-12 Did you think you knew the facts about women and work Think again a terrific book utterly gripping Peter Edelman author of So Rich So Poor For women in professional and corporate jobs much of the discrimination and inequity faced in the past has been confronted and at least to some extent conquered But the fact is that we have a two tiered system where some working women have a full panoply of rights while others have few or none at all We allow blatant discrimination by small employers Domestic workers are cut out of our wage and overtime laws Part time workers disproportionately women are denied basic benefits Laws have been written through a process of compromise and negotiation and in each case vulnerable workers were the bargaining chip that was sacrificed to guarantee the policy s enactment For these workers the system that was supposed to act as a safety net has become a sieve and they

are still falling through Caroline Fredrickson is a powerful advocate and DC insider who has witnessed the legislative compromises that leave out temps farmworkers staff at small businesses immigrants and others who fall outside an intentionally narrow definition of employees The women in this fast growing part of the workforce are denied minimum wage maternity leave health care the right to unionize and protection from harassment and discrimination all within the bounds of the law If current trends continue their fate will be the future of all American workers An informative occasionally shocking exploration of the state of women s rights in the workplace Kirkus Reviews *Choosing College* Michael B. Horn, Bob Moesta, 2019-08-20 Cut through the noise and make better college and career choices This book is about addressing the college choosing problem The rankings metrics analytics college visits and advice that we use today to help us make these decisions are out of step with the progress individual students are trying to make They don t give students and families the information and context they need to make such a high stakes decision about whether and where to get an education *Choosing College* strips away the noise to help you understand why you re going to school What s driving you What are you trying to accomplish Once you know why the book will help you make better choices The research in this book illustrates that choosing a school is complicated By constructing more than 200 mini documentaries of how students chose different postsecondary educational experiences the authors explore the motivations for how and why people make the decisions that they do at a much deeper causal level By the end you ll know why you re going and what you re really chasing The book Identifies the five different Jobs for which students hire postsecondary education Allows you to see your true options for what s next Offers guidance for how to successfully choose your pathway Illuminates how colleges and entrepreneurs can build better experiences for each Job The authors help readers understand not what job students want out of college but what Job students are hiring college to do for them **African American Students' Career and College Readiness** Jennifer R. Curry, M. Ann Shillingford, 2015-10-08 College and career readiness is essential to promoting the success of all students Educational and economic changes in today s society demands well thought out strategies for preparing students to survive academically socially and financially in the future African American students are at a disadvantage in this strategic planning process due to a long history of racism injustice and marginalization *African American Students Career and College Readiness The Journey Unraveled* explores the historical legal and socio political issues of education affecting African American students and their career and college readiness Each chapter has been written based on the authors experience and passion for the success of students in the African American population Some of the chapters will appear to be written in a more conversational and idiomatic tone whereas others are presented in a more erudite format Each chapter however presents a contextual portrayal of the contemporary and often dysfunctional pattern of society s approach to supporting this population Contributors also present progressive paradigms for future achievements Through the pages of this book readers will understand and hopefully appreciate what can be done to promote positive college bound self efficacy procurement of
