Blue Moon Kill Devil Hills:

Moon North Carolina Jason Frye, 2014-04-15 Moon handbooks give you the tools to make your own choices to plan a trip that is perfect for you Red Moon Massimo Capaccioli, 2024-05-08 The book is about the space race starting from the earliest steps of astronautics to the Moon landings of Armstrong and Aldrin The conquest of space began as a by product of an exquisitely military project the rapid and efficient delivery of explosives conventional and then nuclear over great distances into enemy territory It happened at the turn of World War II first with the V2s the Wunderwaffen that von Braun had created for his Führer and after the surrender of Germany and Japan with the intercontinental ballistic missiles that the Russians and Americans built to serve as cabs for atomic bombs Restrained by the fear of nuclear holocaust the two great powers that had momentarily divided the government of the world turned the risky muscular confrontation into an unusual race to climb the sky a stage race with a conventional finish line marked by the human landing on the Moon Under the constant guidance of Sergei Korolev the mysterious chief designer the Soviets got off to a surprise start and stayed in the lead until almost the end with the Sputniks the orbital flights of Gagarin and Tereshkova the first spacewalk and the unmanned soft landings on the Moon and Venus only to be caught up and overtaken by the Americans at the very edge An adventure that lasted a total of twelve years marked by brilliant and courageous men by astute and far sighted politicians by patriotism and ambition and as always regulated by luck which profoundly affected our world and the design of its future
