Instructional-design Theories and Models Charles M. Reigeluth, 2013-05-13 Instructional theory describes a variety of methods of instruction different ways of facilitating human learning and development and when to use and not use each of those methods It is about how to help people learn better This volume provides a concise summary of a broad sampling of new methods of instruction currently under development helps show the interrelationships among these diverse theories and highlights current issues and trends in instructional design It is a sequel to Instructional Design Theories and Models An Overview of Their Current Status which provided a snapshot in time of the status of instructional theory in the early 1980s Dramatic changes in the nature of instructional theory have occurred since then partly in response to advances in knowledge about the human brain and learning theory partly due to shifts in educational philosophies and beliefs and partly in response to advances in information technologies These changes have made new methods of instruction not only possible but also necessary in order to take advantage of new instructional capabilities offered by the new technologies These changes are so dramatic that many argue they constitute a new paradigm of instruction which requires a new paradigm of instructional theory In short there is a clear need for this Volume II of Instructional Design Theories and Models To attain the broad sampling of methods and theories it presents and to make this book more useful for practitioners as well as graduate students interested in education and training this volume contains twice as many chapters but each half as long as the ones in Volume I and the descriptions are generally less technical Several unique features are provided by the editor to help readers understand and compare the theories in this book Chapter 1 which discusses the characteristics of instructional theory and the nature of the new paradigm of instruction helps the reader identify commonalities across the theories Chapter forewords which summarize the major elements of the instructional design theories are useful for reviewing and comparing theories as well as for previewing a theory to decide if it is of interest and for developing a general schema that will make it easier to understand Editor s notes provide additional help in understanding and comparing the theories and the new paradigm of instruction to which they belong Units 2 and 4 have introductory chapters to help readers analyze and understand the theories in those units This is an essential book for anyone interested in exploring new approaches to fostering human learning and development and thinking creatively about ways to best meet the needs of learners in all kinds of learning contexts Readers are invited to use Dr Charles Reigeluth s Web site to comment and to view others comments about the instructional design theories in this book as well as other theories Point your browser to www.indiana.edu/idtheory

Black, 2011-03-17 An overview of peer helping Peer Programs explains the value of and techniques for helping non professionals learn to help others one on one in small groups and in groups of classroom size Intended to be of use to those responsible for planning implementing and or administering peer programs this text

should also convince those who are not directly involved that peer helping is a worthwhile undertaking reducing drug and alcohol abuse dropouts violence and conflict HIV and AIDS pregnancy stress and negative peer pressure **Affective**

Education in Europe Peter Lang,1998-08-01 Affective education can be defined as that part of the educational process which concerns itself with the attitudes feelings beliefs and emotions of students Central to the concept is the acknowledgement that student s feelings about themselves as learners and about their academic subjects can be at least as influential as their actual ability This collection features the work of contributors from countries such as Belgium Denmark Russia Germany Israel Spain and the UK It shows how the practical approach to affective education varies from nation to nation By analyzing the underlying theory this text sets out to bring the different approaches closer together to enable teachers across the continent to work towards a positive common ground **It Starts with People** Hank Resnik,1978

Research in Education ,1974 **Resources in Education** ,1999-10 *Using Social Emotional Learning to Prevent School Violence* Allison Paolini,2022-06-15 Using Social Emotional Learning to Prevent School Violence is an essential resource that seeks to close the existing gap in literature on ways to mitigate school violence as well as to advocate for the integration of social emotional learning in schools In an effort to create culturally responsive student centered and secure school environments this book outlines strategies that highlight the importance of collaboration between critical stakeholders in identifying and mitigating bullying assisting students struggling with relationship building skills grief and loss and anger particularly those that demonstrate the need for power and control or the desire for retaliation Mental health issues are also taken into consideration Proactive responses and best practices are exemplified in order to equip struggling students with resources that foster their well being and success Dr Paolini draws upon extensive research in her depiction of school violence in America s education system and designs lesson plans and activities that address and align with each of the social emotional learning core competencies for both elementary and secondary school counselors This book will be of interest to critical stakeholders in P 12 settings as well as those in higher education particularly as a resource for graduate students training to become transformative school counselors **DARE to Say No** Max Felker-Kantor,2024-02-14 With its signature DARE to keep kids off drugs slogan and iconic t shirts DARE Drug Abuse Resistance Education was the most popular drug education program of the 1980s and 1990s But behind the cultural phenomenon is the story of how DARE and other antidrug education programs brought the War on Drugs into schools and ensured that the velvet glove of antidrug education would be backed by the iron fist of rigorous policing and harsh sentencing Max Felker Kantor has assembled the first history of DARE which began in Los Angeles in 1983 as a joint venture between the police department and the unified school district By the mid 90s it was taught in 75 percent of school districts across the United States DARE received near universal praise from parents educators police officers and politicians and left an indelible stamp on many millennial memories But the program had more nefarious ends and Felker Kantor complicates simplistic narratives of the War on Drugs He shows how policing

entered US schools and framed drug use as the result of personal responsibility moral failure and poor behavior deserving of punishment rather than something deeply rooted in state retrenchment the abandonment of social service provisions and structures of social and economic inequality
