Africas Ict Infrastructure Directions In Development:

Africa's ICT Infrastructure Vivien Foster, Cecilia Briceño-Garmendia, 2011-06-23 Africa's ICT Infrastructure reviews how the investment in the sector has been financed and how the structure of the market has changed since the liberalization process started. It looks at the role of both private and public institutions as sources of financing for the sector and charts the emergence of investors from developing countries in leading the expansion of the sector across the region. *Africa's Infrastructure* World Bank, 2009-12-01 Sustainable infrastructure development is vital for Africa's prosperity. And now is the time to begin the transformation. This volume is the culmination of an unprecedented effort to document, analyze and interpret the full extent of the challenge in developing Sub-Saharan Africa's infrastructure sectors. As a result, it represents the most comprehensive reference currently available on infrastructure in the region. The book covers the five main economic infrastructure sectors: information and communication technology, irrigation, power, transport, and water and sanitation. *Africa's Infrastructure: A Time for Transformation* reflects the collaboration of a wide array of African regional institutions and development partners under the auspices of the Infrastructure Consortium for Africa. It presents the findings of the Africa Infrastructure Country Diagnostic (AICD), a project launched following a commitment in 2005 by the international community after the G8 summit at Gleneagles, Scotland, to scale up financial support for infrastructure development in Africa. The lack of reliable information in this area made it difficult to evaluate the success of past interventions, prioritize current allocations, and provide benchmarks for measuring future progress; hence the need for the AICD. Africa's infrastructure sectors lag well behind those of the rest of the world, and the gap is widening. Some of the main policy-relevant findings highlighted in the book include: infrastructure in the region is exceptionally expensive, with tariffs being many times higher than those found elsewhere; inadequate and expensive infrastructure is retarding growth by 2 percentage points each year; solving the problem will cost over US\$90 billion per year, which is more than twice what is being spent in Africa today. However, money alone is not the answer. Prudent policies, wise management, and sound maintenance can improve efficiency, thereby stretching the infrastructure dollar. There is the potential to recover an additional US\$17 billion a year from within the existing infrastructure resource envelope simply by improving efficiency. For example, improved revenue collection and utility management could generate US\$3.3 billion per year; regional power trade could reduce annual costs by US\$2 billion; and deregulating the trucking industry could reduce freight costs by one-half. So raising more funds without also tackling inefficiencies would be like pouring water into a leaking bucket. Finally, the power sector and fragile states represent particular challenges. Even if every efficiency in every infrastructure sector could be captured, a substantial funding gap of \$31 billion a year would remain. Nevertheless, the African people and economies cannot wait any longer. Now is the time to begin the transformation to sustainable development. **Routledge Handbook of Counterterrorism and Counterinsurgency in Africa** Usman A. Tar, 2021-01-28 This book illustrates how Africa's defence and security domains have been radically

altered by drastic changes in world politics and local ramifications First the contributions of numerous authors highlight the transnational dimensions of counterterrorism and counterinsurgency in Africa and reveal the roles played by African states and regional organisations in the global war on terror Second the volume critically evaluates the emerging regional architectures of countering terrorism insurgency and organised violence on the continent through the African Union Counterterrorism Framework AU CTF and Regional Security Complexes RSC Third the book sheds light on the counterterrorism and counterinsurgency CT COIN structures and mechanisms established by specific African states to contain degrade and eliminate terrorism insurgency and organised violence on the continent particularly the successes constraints and challenges of the emerging CT COIN mechanisms Finally the volume highlights the entry of non state actors such as civil society volunteer groups private security companies and defence contractors into the theatre of counterterrorism and counterinsurgency in Africa through volunteerism community support for state led CT COIN Operations and civil military cooperation CIMIC This book will be of use to students and scholars of security studies African studies international relations and terrorism studies and to practitioners of development defence security and strategy

Accelerating Poverty Reduction in Africa Kathleen Beegle,Luc Christiaensen,2019-03-01 Sub Saharan Africa s turnaround over the past couple of decades has been dramatic After many years in decline the continent s economy picked up in the mid 1990s Along with this macroeconomic growth people became healthier many more youngsters attended schools and the rate of extreme poverty declined from 54 percent in 1990 to 41 percent in 2015 Political and social freedoms expanded and gender equality advanced Conflict in the region also subsided although it still claims thousands of civilian lives in some countries and still drives pressing numbers of displaced persons Despite Africa s widespread economic and social welfare accomplishments the region s challenges remain daunting Economic growth has slowed in recent years Poverty rates in many countries are the highest in the world And notably the number of poor in Africa is rising because of population growth From a global perspective the biggest concentration of poverty has shifted from South Asia to Africa Accelerating Poverty Reduction in Africa explores critical policy entry points to address the demographic societal and political drivers of poverty improve income earning opportunities both on and off the farm and better mobilize resources for the poor It looks beyond macroeconomic stability and growth critical yet insufficient components of these objectives to ask what more could be done and where policy makers should focus their attention to speed up poverty reduction The pro poor policy agenda advanced in this volume requires not only economic growth where the poor work and live but also mitigation of the many risks to which African households are exposed As such this report takes a jobs lens to its task It focuses squarely on the productivity and livelihoods of the poor and vulnerable that is what it will take to increase their earnings Finally it presents a road map for financing the poverty and development agenda
