Ageless Quest One Scientists Search For The Genes That Prolong Youth:

Ageless Quest Leonard Guarente, 2003 *Ageless Quest* is a personal sometimes controversial account of the pursuit of a genetic cure for aging by an expert in the field. The author is the Novartis Professor of Biology at the Massachusetts Institute of Technology. Aging has always been regarded as a highly complex process with many degenerative changes leading to the cessation of life. But recent research has identified a relatively simple mechanism that governs the pace of aging. Lenny Guarente's *Ageless Quest* is a scientific detective story for the baby boom generation. It offers an insider's view of an area of potentially astonishing high reward and equally high risk. **The Quest for Human Longevity** Lewis D.

Solomon, 2017-12-02 Many scientists today are working to retard the aging process in humans so as to increase both life expectancy and the quality of life. Over the past decade impressive results have been achieved in targeting the mechanisms and pathways of aging. In *The Quest for Human Longevity* Lewis D. Solomon considers these scientific studies by exploring the principal biomedical anti-aging techniques. The book also considers cutting edge research on mental enhancements and assesses the scientific doubts of skeptics. *The Quest for Human Longevity* is also about business. Solomon examines eight corporations pursuing various age-related interventions, profiling their scientific founders and top executives and examining personnel, intellectual property and financing for each firm. Academic scientists form the link between research and commerce. Solomon notes that the involvement of university scientists and researchers follows one of two models. The first is a traditional model in which scientists leave academia to work for a corporation or remain in academia and obtain business support for their research. The second is a modern model in which scientists use their intellectual property as a catalyst for acquiring equity interests in the firms they organize. Critics have pointed to the dangers of commercialized science but Solomon's analysis on balance finds that the benefits outweigh the costs and that problems of secrecy and conflicts of interest can be addressed. If scientists succeed in unlocking the secrets of aging and developing drugs or therapies that will allow us to live decades longer, the consequences for society will include profound social, political, economic and ethical questions. Solomon deals with the public policy aspects of significant life extension and looks at the conflict between those who advocate the acceptance of mortality and the partisans of life. *The Quest for Human Longevity* will be of interest to policymakers, sociologists, scientists and students. The Long Tomorrow Michael R. Rose, 2005-09-15 Equally important, Rose surveys the entire field, offering colorful portraits of many leading scientists and shedding light on research findings from around the world. We learn that rodents given fifteen to forty percent fewer calories live about that much longer and that volunteers in Biosphere II who lived on reduced caloric intake for two years all had improved vital signs. Perhaps most interesting, we discover that aging hits a plateau and stops at least it does so in fruit flies. Jacket The Longevity Factor

Joseph Maroon, 2008-12-30 A groundbreaking examination of new scientific research that holds the secret to weight loss, increased strength, endurance, memory and a healthier longer life. In *The Longevity Factor*, noted neuroscientist and surgeon

Joseph Maroon M D offers the definitive look at recent scientific breakthroughs identifying a group of natural substances including the much publicized molecule resveratrol that can actually activate a specific set of genes in humans that promote a longer healthier life These substances which make red wine dark chocolate and green tea good for us appear to stave off a wide array of age related diseases and keep us feeling young and vital Resveratrol is the centerpiece of headline making research being conducted at the Harvard Medical School and elsewhere Only recently however have scientists discovered how to isolate resveratrol and concentrate it into an affordable and safe supplement Already more than 200 supplements featuring resveratrol have flooded the market and there are countless more on the way But which ones work best What is a consumer to look for on the label Since resveratrol is a natural substance can you get enough of it through diet alone or should you combine diet with a supplement And what lies on the horizon from the pharmaceutical industry All those questions and many more are answered in this immensely informative and practical book Joseph Maroon offers the first ever inside look at the amazing research that has led to the discovery of resveratrol and similar substances with the miraculous ability to activate our own longevity genes He also offers his own diet plan and sound reader friendly advice for living a longer healthier and more balanced life with or without supplements The Longevity Factor promises to be the authoritative source for everyone who wants to know more about how we can shift from the current paradigm of aging to a disease free golden age of health longevity and fitness *The Influence of Genetics on Contemporary Thinking* Anne
