

To Remove the Tracking Unit: Steps 1-6 >

WARNING! Do NOT cut the strap to remove the tracking unit from the client's ankle.

Step 1

While the tracking unit is still on the client's ankle, insert a screwdriver into the notched grooves on the locking pins. Turn the screwdriver counter-clockwise until the hinge assembly is released. You must complete this step for both locking pins on each side of the hinge assembly. Discard the locking pins.

Step 2

Pull firmly on the fixed strap to release the fiber-optic connector from the hinge post.

Step 3

Remove the hinge assembly from the adjustable strap. Clean the hinge assembly with Lysol or similar product, and store the assembly for reuse.

INTRODUCTION

The ExacuTrack One tracking unit is a GPS device secured around the client's ankle. This device includes the following features:

- GPS Receiver
- AFLT Location Technology
- Assisted GPS Technology
- RF Receiver

Use this guide to properly install the tracking unit on your client's ankle. For detailed information about this product, see the *BI ExacuTrack One Officer's Reference Guide*.

INSTALLATION

The installation process for the ExacuTrack One tracking unit involves three separate steps:

- Assembling the tracking unit
- Sizing for proper fit
- Attaching the tracking unit to the client

You will need both a standard and Phillips screwdriver to complete the installation. Discard the locking pins after each use, and discard the backplate after each battery replacement; locking pins and backplates are available by order from BI Incorporated. All other supplies - **including the straps** - are reusable and should not be discarded. Keep in mind that the battery should be replaced after 2 years of continuous use.
