Awareness in Logic and Epistemology Claudia Fernández-Fernández, 2021-06-19 This book creates a conceptual schema that acts as a correlation between Epistemology and Epistemic Logic It connects both fields and offers a proper

theoretical foundation for the contemporary developments of Epistemic Logic regarding the dynamics of information It builds a bridge between the view of Awareness Justification Internalism and a dynamic approach to Awareness Logic The book starts with an introduction to the main topics in Epistemic Logic and Epistemology and reviews the disconnection between the two fields It analyses three core notions representing the basic structure of the conceptual schema Epistemic Awareness Knowledge and Justification Next it presents the Explicit Aware Knowledge EAK Schema using a diagram of three ellipses to illustrate the schema and a formal model based on a neighbourhood model structure that shows one concrete application of the EAK Schema into a logical structure The book ends by presenting conclusions and final remarks about the uses and applications of the EAK Schema It shows that the most important feature of the schema is that it serves both as a theoretical correlate to the dynamic extensions of Awareness Logic providing it with a philosophical background and as an abstract conceptual structure for a re interpretation of Epistemology
