Nevertheless, most students are accustomed to the conventional teacher-centered way of learning; thus, they are not competent at self-regulated learning. A Self-Management Tool was developed to guide and enhance students' usage of self-regulated learning strategies. The tool comprises three components: Information Management Tool, Personal Management Tool, and a Teacher's Manual. A quasi-experimental study was conducted to test its effectiveness, and the details of this empirical research were documented in this monograph. The monograph is divided into six chapters with detailed descriptions on the research methodology. The Self-Management Tool was found to be effective in improving students' self-regulated learning. The findings have significant research and educational implications. Recommendations for future research are included in the final chapter of the monograph.
