Building Websites with Joomla! 1.5 Hagen Graf, 2008 The best selling Joomla tutorial guide updated for the latest 1.5 release

Building websites with Joomla! Hagen Graf, 2006 This book focuses on taking you through the essential tasks to create a Joomla site as fast as possible. These essential tasks are explained clearly with well structured step by step instructions. The book does not aim to cover every feature of Joomla nor is it a comprehensive guide to extending Joomla. Almost everything in the book is accomplished without recourse to the underlying PHP code in which Joomla is written. The book is very readable and the author has a particularly chatty and engaging writing style. This book is suitable for web developers, designers, webmasters, content editors and marketing professionals who want to develop a fully featured web presence in a simple and straightforward process. It does not require any detailed knowledge of programming or web development and any IT confident individual will be able to use the book to produce an impressive web site.

Web Design & Development Nicolae Sfetcu, A guide for developing web sites by means of conceptualization, planning, modeling and execution of electronic media delivery via Internet. Web development is a broad term for any activities related to developing a web site for the World Wide Web or an intranet. This can include e-commerce, business development, web design, web content development, client side, server side coding and web server configuration. However, among web professionals, web development usually refers only to the non-design aspects of building web sites, e.g. writing markup and coding. Web development can range from developing the simplest static single page of plain text to the most complex web-based internet applications, electronic businesses or social network services. Web design is a process of conceptualization, planning, modeling and execution of electronic media delivery via Internet in the form of Markup language suitable for interpretation by Web browser and display as Graphical user interface (GUI).

Java EE 5 Development Using GlassFish Application Server David R. Heffelfinger, 2007 This is a guide to developing Java EE 5 applications deployed to the high performance Java EE 5 compliant GlassFish application server which is quickly gaining massive popularity. After GlassFish installation and configuration, it covers application development including all major Java EE 5 APIs: JSPs, JSTL, Servlets and JSF for web applications, the Java Persistence API and JDBC to interact with RDBMS, EJB 3 including container managed transactions and EJB declarative security through annotations, the JMS API for messaging, the JAAS API for secure applications, frameworks built on the Java EE 5 specification including Seam, Facelets and Ajax4jsf. It is aimed at Java developers wishing to become proficient with Java EE 5 who are expected to have some experience with Java and J2EE technologies and to have developed and deployed applications in the past but need no previous knowledge of Java EE and will teach the reader how to use GlassFish to develop and deploy applications.
