hydrological modeling data assimilation and hydrological capacity building in emerging regions Encyclopedia of Ecology Brian D. Fath, 2018-08-23 Encyclopedia of Ecology Second Edition Four Volume Set continues the acclaimed work of the previous edition published in 2008 It covers all scales of biological organization from organisms to populations to communities and ecosystems Laboratory field simulation modelling and theoretical approaches are presented to show how living systems sustain structure and function in space and time New areas of focus include micro and macro scales molecular and genetic ecology and global ecology e g climate change earth transformations ecosystem services and the food water energy nexus are included In addition new international experts in ecology contribute on a variety of topics Offers the most broad ranging and comprehensive resource available in the field of ecology Provides foundational content and suggests further reading Incorporates the expertise of over 500 outstanding investigators in the field of ecology including top young scientists with both research and teaching experience Includes multimedia resources such as an Interactive Map Viewer and links to a CSDMS Community Surface Dynamics Modeling System an open source platform for modelers to share and link models dealing with earth system processes **Remotely Sensed Albedo** Jean-Louis Roujean, Shunlin Liang, Tao He, 2021-02-24 Albedo is a known and documented phenomenon defined as the reflectivity of a surface i e the ratio of reflected light energy to incident light energy It is a dimensionless quantity used in particular in agro forestry urban environment cryosphere and geology It is an Essential Climate Variable ECV deemed extremely meaningful to compute the earth heat balance The albedo of natural surfaces varies largely especially in the visible with the lowest values found for water bodies and dense vegetation canopies and the highest values for desert and snow It also changes with the angular distribution and spectral composition of the incident radiation and with the surface moisture Satellite observations allow consistent measuring of the surface albedo at continental scale over a short period of time Long term series of surface albedo are good indicators of climate change especially over glaciers and polar caps On the other hand the albedo of bare soil provides a good diagnostic of their degradation The reliability of satellite albedo is verified against ground based radiometers and UAV which also serves to calibrate the instruments embarked on space borne observing systems and check the quality of the atmospheric correction Remote Sensing for Malaria Felix Kogan, 2020-07-20 This book presents research using high resolution operational satellite data for monitoring and assessing numerically how to reduce the area and intensity of malaria outbreaks Satellite data and imageries a powerful and effective tool for malaria monitoring and reduction of the number of affected people as it bypasses the limitations imposed by the dearth of near the ground weather data in many malaria prone areas With this in mind this volume provides readers with In depth information in monitoring signs of malaria from operational polar orbiting satellites Examples of country specific models for predicting malaria area 1 and 4 km² resolution and intensity Information on the how the effects of climate change on malaria outbreak area and intensity can be monitored A new Vegetation Health VH methodology to estimate vegetation moisture temperature and moisture temperature conditions

as indicators of malaria vector activity Advice to users on the application of VH technology for early assessments of malaria area intensity and risk level Remote Sensing for Malaria is intended for an audience of public health practitioners environmentalists and students and researchers working in spatial epidemiology and disease prevention
