

Bounded rationality and public policy: Herbert A. Simon and the decisional foundation of collective choice¹

BRYAN D. JONES

Department of Political Science, University of Washington, Seattle, U.S.A.

Abstract. By 1958, a model of human behavior capable of serving as the micro-level foundation for organizational and policy studies was in place, due primarily to the efforts of Herbert Simon, organization theorist James March, and computer scientist Allen Newell. Yet the fundamentals of that model, the *behavioral model of choice*, to this date have not been fully incorporated into policy studies and organizational analyses. The 'Simon program' remains incomplete. Much analysis continues to rely on thick or thin models of rational maximization. As is well-known, the behavioral model of choice links to organizational processes better than rational actor assumptions. But the behavioral model of choice also predicts distributions of organizational and policy outputs in a superior fashion, and need not draw in extraneous descriptive facets of human behavior to the analysis. As Herb Simon did beginning in 1945 until his death in 2001, I continue to advocate a solid behavioral base for the analysis of political and economic systems.

Introduction

Public policies are binding, authoritative collective choices. The study of public policy addresses how the thoughts and actions of people are translated into such collective decisions, and how those decisions impact the collectivity. So the study of public policies must address, directly or indirectly, issues in human cognition.

Most of us studying public policy, whether in a theoretical or applied vein, care little about the fine details of the specifics of human cognition; we are quite content to leave that to biologists, psychologists, and cognitive scientists. **What we do need, however, is a model of the bases of human behavior in organizations.** That model must fulfill three criteria: first it must do no harm (it should not mislead); second, it must allow us to move between individual level processes and organizational processes in a more or less seamless manner; and third, it should be efficient, in that it does not drag in specifics of human behavior that are not needed to understand the policymaking process.²

In this paper I show how the model of bounded rationality, as initially articulated by Herbert A. Simon and expanded by Simon, organizational theorists such as James A. March, and cognitive scientists, especially Allen Newell, serves such a purpose. As such, I address a common complaint of many social scientists that, because bounded rationality is open-ended and supposedly ill-defined, it cannot serve as a firm foundation for connecting individual behavior and collective choice. On the contrary, I show that **it is**

Bounded Rationality and Public Policy Alistair Munro, 2009-06-10 This book is about bounded rationality and public policy It is written from the perspective of someone trained in public economics who has encountered the enormous literature on experiments in decision making and wonders what implications it has for the normative aspects of public policy Though there are a few new results or models to a large degree the book is synthetic in tone bringing together disparate literatures and seeking some accommodation between them It has had a long genesis It began with a draft of a few chapters in 2000 but has expanded in scope and size as the literature on behavioural economics has grown At some point I realised that the geometric growth of behavioural search and the arithmetic growth of my writing were inconsistent with an ambition to be exhaustive As such therefore I have concentrated on particular areas of behavioural economics and bounded rationality The resulting book is laid out as follows Chapter 1 provides an overview of the rest of the book goes through some basic definitions and identifies themes *Routledge Handbook of Public Policy* Eduardo Araral, 2013 This Handbook provides a comprehensive global survey of the policy process Written by an outstanding line up of distinguished scholars and practitioners the Handbook covers all aspects of the policy process including Theory from rational choice to the new institutionalism Frameworks network theory advocacy coalition and development models Key stages in the process formulation implementation and evaluation Agenda setting and decision making The roles of key actors and institutions This is an invaluable resource for all scholars graduate students and practitioners in public policy and policy analysis Publisher description **Handbook of Public Policy** B Guy Peters, Jon Pierre, 2006-07-20 The new handbook by Peters and Pierre provides an invaluable addition to the literature It offers new scholars and practitioners a means to navigate many of the complex theoretical and practical issues in contemporary policy analysis Mark Considine University of Melbourne The public policies of governments affect the lives and livelihoods of citizens every day in every country around the world This handbook provides a comprehensive review and guide to the study theory and practice of public policy today Section One Making Policy introduces the policy making process the means by which public policies are formulated adopted and implemented and serves to review the many competing conceptualizations within the field Section Two Substantive Policy Areas focuses on a number of substantive policy areas to consider both diversity and commonalities across different sectoral policy areas Section Three Evaluating Public Policy addresses issues of policy analysis more directly and assesses successes and failures in public policy in an attempt to answer the question what is good policy The concluding chapter considers the different disciplinary contributions to the research and study of public policy both retrospectively and prospectively Drawing contributions from leading academics and policy analysts from around the world the handbook illustrates the changing role of governments vis-à-vis the public and private sector and the different policy actors national and international governmental and non-governmental involved in the policy making process It will be an essential companion for all advanced undergraduates
