Building Ibm Building Ibm:

Building IBM Emerson W. Pugh, 1995 No company of the twentieth century achieved greater success and engendered more admiration respect envy fear and hatred than IBM Building IBM tells the story of that company how it was formed how it grew and how it shaped and dominated the information processing industry Emerson Pugh presents substantial new material about the company in the period before 1945 as well as a new interpretation of the postwar era Granted unrestricted access to IBM's archival records and with no constraints on the way he chose to treat the information they contained Pugh dispels many widely held myths about IBM and its leaders and provides new insights on the origins and development of the computer industry Pugh begins the story with Herman Hollerith's invention of punched card machines used for tabulating the U S Census of 1890 showing how Hollerith's inventions and the business he established provided the primary basis for IBM He tells why Hollerith merged his company in 1911 with two other companies to create the Computing Tabulating Recording Company which changed its name in 1924 to International Business Machines Thomas J Watson who was hired in 1914 to manage the merged companies exhibited remarkable technological insight and leadership in addition to his widely heralded salesmanship to build Hollerith's business into a virtual monopoly of the rapidly growing punched card equipment business The fascinating inside story of the transfer of authority from the senior Watson to his older son Thomas J Watson Jr and the company's rapid domination of the computer industry occupy the latter half of the book In two final chapters Pugh examines conditions and events of the 1970s and 1980s and identifies the underlying causes of the severe problems IBM experienced in the 1990s Publisher *IBM Building* International Business Machines Corporation, 1969

Designs on the Public Kristine F. Miller, New York City is home to some of the most recognizable places in the world As familiar as the sight of New Year's Eve in Times Square or a protest in front of City Hall may be to us do we understand who controls what happens there Kristine Miller delves into six of New York's most important public spaces to trace how design influences their complicated lives Miller chronicles controversies in the histories of New York locations including Times Square Trump Tower the IBM Atrium and Sony Plaza The story of each location reveals that public space is not a concrete or fixed reality but rather a constantly changing situation open to the forces of law corporations bureaucracy and government The qualities of public spaces we consider essential including accessibility public ownership and ties to democratic life are at best temporary conditions and often completely absent Design is in Miller's view complicit in regulation of public spaces in New York City to exclude undesirables restrict activities and privilege commercial interests and in this work she shows how design can reactivate public space and public life Kristine F Miller is associate professor of landscape architecture at the University of Minnesota

Seeking Justice for the Holocaust Graham B. Cox, 2019-09-12 The Nuremberg War Crimes Trial has become a symbol of justice the pivotal moment when the civilized world stood up for Europe's Jews and ultimately for human rights Yet the world represented at the time by the Allied powers almost did not stand up despite the magnitude of the horrors perpetrated by the Nazis Seeking justice for the Holocaust had not been an automatic or an obvious mission for the Allies to pursue In this book Graham Cox recounts the remarkable negotiations and calculations that brought the United States and its allies to this point At the center of this story is the collaboration between Franklin D Roosevelt and Herbert C

Pell Roosevelt's appointee as U.S. representative to the United Nations War Crimes Commission in creating an international legal protocol to prosecute Nazi officials for war crimes and genocide Pell emerges here as an unheralded force in pursuing justice and in framing human rights as an international concern. The book also enlarges our perspective on Roosevelt's policies regarding European Jews by revealing the depth of his commitment to postwar justice in the face of staunch opposition even from some within his administration. What made the international effort especially contentious was a debate over its focus: how to punish for aggressive warfare and crimes against humanity. Cox exposes the internal contradictions and contortions behind the U.S. position and the maneuverings of numerous officials negotiating the legal parameters of the trials. Most telling perhaps were the efforts of Robert H. Jackson, the chief U.S. prosecutor at Nuremberg, to circumscribe the scope of new international law for fear of setting precedents that might boomerang on the United States because of its own racial segregation practices. With its broad new examination of the background and context of the Nuremberg trials and its expanded view of the roles played by Roosevelt and his unlikely deputy Pell, *Seeking Justice for the Holocaust* offers a deeper and more nuanced understanding of how the Allies came to hold Nazis accountable for their crimes against humanity.

Computer Martin Campbell-Kelly, William F. Aspray, Jeffrey R. Yost, Honghong Tinn, Gerardo Con Díaz, 2023-06-19

Computer: A History of the Information Machine traces the history of the computer and its unlimited information processing potential. Comprehensive and accessibly written, this fully updated fourth edition adds new chapters on the globalization of information technology, the rise of social media, fake news, and the gig economy, and the regulatory frameworks being put in place to tame the ubiquitous computer. *Computer* is an insightful look at the pace of technological advancement and the seamless way computers are integrated into the modern world. The authors examine the history of the computer, including the first steps taken by Charles Babbage in the nineteenth century and how wartime needs and the development of electronics led to the giant ENIAC, the first electronic computer. For a generation, IBM dominated the computer industry. In the 1980s, the desktop PC liberated people from room-sized mainframe computers. Next, laptops and smartphones made computers available to half of the world's population, leading to the rise of Google and Facebook and powerful apps that changed the way we work, consume, learn, and socialize. The volume is an essential resource for scholars and those studying computer history, technology, history, and information, and society, as well as a range of courses in the fields of computer science, communications, sociology, and management.

Howard Aiken I. Bernard Cohen, 2000. *Biography of Howard Aiken*, a major figure of the early digital era, by a major historian of science who was also a colleague of Aiken's at Harvard. Howard Hathaway Aiken (1900-1973) was a major figure of the early digital era. He is best known for his first machine, the IBM Automatic Sequence Controlled Calculator, or Harvard Mark I, conceived in 1937 and put into operation in 1944. But he also made significant contributions to the development of applications for the new machines and to the creation of a university curriculum for computer science. This biography of Aiken, by a major historian of science who was also a colleague of Aiken's at Harvard, offers a clear and often

entertaining introduction to Aiken and his times Aiken's Mark I was the most intensely used of the early large scale general purpose automatic digital computers and it had a significant impact on the machines that followed Aiken also proselytized for the computer among scientists scholars and businesspeople and explored novel applications in data processing automatic billing and production control But his most lasting contribution may have been the students who received degrees under him and then took prominent positions in academia and industry I Bernard Cohen argues convincingly for Aiken's significance as a shaper of the computer world in which we now live
