Anglo Norman Warfare:

Anglo-Norman Warfare Matthew Strickland, 1992 Articles fundamental to the study of warfare in England and Normandy in the 11th and 12th centuries collected here in one volume The influence of war on late Anglo Saxon and Anglo Norman society was dominant and all pervasive Here in this book gathered together for the first time are fundamental articles on warfare in England and Normandy in the 11th and 12th centuries combining the work of some of the foremost scholars in the field Redressing the tendency to study military institutions and obligations in isolation from the practice of war equal emphasis is given both to organisation and composition of forces and to strategy tactics and conduct of war The result is not only an in depth analysis of the nature of war itself but a study of warfare in a broader social political and cultural context The Themes dealt with largely span the period of the Conquest offering an assessment of the extent to which the Norman invasion marked radical change or a degree of continuity in the composition of armies and in methods of fighting This important collection with an introduction and select bibliography will be essential not simply for the student of medieval warfare but for all studying Anglo Norman society and its ruling warrior aristocracy whose raison d'être was war Contributors NICHOLAS HOOPER MARJORIE CHIBNALL J C HOLT J O PRESTWICH R ALLEN BROWN JOHN GILLINGHAM JIM BRADBURY MATTHEW STRICKLAND MATTHEW BENNETT **Warfare Under the Anglo-Norman Kings,**

1066-1135 Stephen Morillo, 1994 An interwoven study in many ways refreshing and original A good book the first major product of one of the more vital debates in recent early medieval scholarship HISTORY A major re statement of the nature of Anglo Norman warfare with special emphasis on the role of the familia regis the King's military household This study of the battles waged between 1066 and 1135 by the Anglo Norman kings of England William the Conqueror William Rufus and Henry I is a major restatement of the nature of medieval warfare in the eleventh and twelfth centuries Bringing together the two major trends in recent medieval military history the study of military organisations and the study of campaigns Stephen Morillo illuminates the interrelationship of military organisation and social and political structures and brings many new perceptions to bear such as the central role of the familia regis the King's military household The roles of armies and castles and the normal activities of warfare are examined to show why sieges were far more common than pitched battles Siege and battle tactics are analysed in the context of social and political influences administrative structures and campaign patterns and a connection is proposed in most pre modern warfare between government strength and infantry quality Dr STEPHEN MORILLO teaches at Wabash College Indiana He has published numerous articles on Anglo Norman warfare

War and Chivalry Matthew Strickland, 1996-12-12 This is the first large scale study of conduct in warfare and the nature of chivalry in the Anglo Norman period The extent to which the knighthood consciously sought to limit the extent of fatalities among its members is explored through a study of notions of a brotherhood in arms the actualities of combat and the effectiveness of armour the treatment of prisoners and the workings of ransom Were there laws of war in operation in the eleventh and twelfth centuries and if so were they binding How far did notions of honour affect knights actions in war itself Conduct in war against an opposing suzerain such as the Capetian king is contrasted to behaviour in situations of rebellion and of civil war An overall context is provided by an examination of the behaviour in war of the Scots and the mercenary routiers both accused of perpetrating atrocities
