Animal Alterity Science Fiction And The Question Of The Animal:

Animal Alterity Sherryl Vint, 2010-01-01 *Animal Alterity* uses readings of science fiction texts to explore how animals are central to our perception of humanity. Arguing that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns, Sherryl Vint expresses an urgent need to reconsider the human-animal boundary in a world of genetic engineering, factory farming, species extinctions, and increasing evidence of animal intelligence, emotions, and tool use. Mapping the complex terrain of human relations with non-human animals, this book offers an important intervention into the contentious ongoing discussions of the post-human.

Animal Alterity Sherryl Vint, 2010-04-21 *Animal Alterity* uses readings of science fiction texts to explore the centrality of animals for our ways of thinking about human. It argues that the academic field of animal studies and the popular genre of science fiction share a number of critical concerns: thinking about otherness and the nature of human being, desiring communication across species difference, and interrogating the social and ethical consequences of changes in science and technology. We are living in a complex set of contradictory and conflicting relations with non-human animals. This book maps this complex terrain, arguing that we are better able to perceive options for a transformed politics if we perceive our various material relations with non-human animals within a deeper understanding of the functions of the category animal.

Animals and Science Fiction Nora Castle, Giulia Champion, 2024-03-22 *Animals and Science Fiction* is the first edited collection to be published focusing on the intersection of animal studies and science fiction studies. It offers a broad range of theoretical approaches and primary source texts including novels, short stories, poetry, film, and TV, photography, erotica, video games, and urban planning documents that explore the ways works of science fiction can transform how we see and interact with nonhuman others. With an eye toward more just multispecies futures, it argues that speculative imaginaries can be pivotal in changing attitudes toward and understandings of nonhuman animals in our world today. Chapters appeal to those interested in biopolitics, posthumanism, new materialism, ecocriticism, and the environmental humanities, ocean humanities, postcolonial studies, critical race studies, Indigenous studies, global sf studies, film studies, and food studies. Taken together, the collection works to showcase a diverse and growing field of scholarly inquiry into animals and science fiction.

Literary Animal Studies and the Climate Crisis Sune Borkfelt, Matthias Stephan, 2022-11-22 *Literary Animal Studies and the Climate Crisis* connects insights from the field of literary animal studies with the urgent issues of climate change and environmental

degradation and features considerations of new interventions by literature in relation to these pressing questions and debates This volume informs academic debates in terms of how nonhuman animals figure in our cultural imagination of topics such as climate change extinction animal otherness the posthuman and environmental crises Using a diverse set of methodologies each chapter presents relevant cases which discuss the various aspects of these interstices This volume is an intersection between literary animal studies and climate fiction intended as an interdisciplinary intervention that speaks to the global climate debate and is thus relevant across the environmental humanities

Doing Animal Studies with Androids, Aliens, and Ghosts David P. Rando, 2023-04-06 Exploring what can be learnt when literary critics in the field of animal studies temporarily direct attention away from representations of nonhuman animals in literature and towards liminal figures like androids aliens and ghosts this book examines the boundaries of humanness Simultaneously it encourages the reader both to see nonhuman animals afresh and to reimagine the terms of our relationships with them Examining imaginative texts by writers such as Octavia Butler Philip K Dick Kazuo Ishiguro Jeanette Winterson and J M Coetzee this book looks at depictions of androids that redefine traditional humanist qualities such as hope and uniqueness It examines alien visions that unmask the racist and heteronormative roots of speciesism And it unpacks examples of ghosts and spirits who offer posthumous visions of having been human that decenter anthropocentrism In doing so it leaves open the potential for better relationships and futures with nonhuman animals
