A Strategy For Stable Peace Toward A Euroatlantic Security Community:

A Strategy for Stable Peace James E. Goodby, Piet Buwalda, Dmitriï Trenin, 2002 The United States Russia and all the nations of Europe could eliminate war as a means of settling disputes among themselves It will not be easy but it is within their reach Thus begins this bold and yet pragmatic argument for creating a security community that runs from Vancouver to Vladivostock In *A Strategy for Stable Peace* three eminent diplomats and scholars from Europe and the United States urge us to make the new decade a turning point in history In place of the wars and near wars that have plagued Euroatlantic relations over centuries close and enduring cooperation can gradually be built on the basis of shared interests and common values After first outlining the concept of stable peace the volume describes the current political economic and security climates within Russia the European Union and the United States and then assesses various models before recommending a strategy for achieving a stable peace Drawing on their extensive experience the authors recommend a series of concrete practicable policies both long and near term that the leaders of their nations can adopt *Practical Lessons from US Foreign Policy* James E. Goodby, Kenneth Weisbrode, 2019-11-05 In foreign policy the Trump administration has appeared to depart from long standing norms of international behavior that have underwritten American primacy for decades in a more interdependent and prosperous world In this book a diplomat and a historian revisit that perception by examining and reproducing several of their own essays during the past twenty years The essays reveal that Trump's style exaggerates tendencies towards unilateralism already present in the actions if not the policies of previous presidents and in their neglect of three imperatives collective security regional integration and diplomatic imagination It is not too late however to remedy the problem by learning the lessons of the recent past **Parameters**, 2002 Peaceworks, 1995 **Promoting Middle East Democracy** Mona Yacoubian, 2008-05 European security concerns have focused increasingly on the potential for instability on Europe's southern flank In 1995 the European Union developed a framework for cooperation with the southern Mediterranean nations In the aftermath of 9 11 the goal of encouraging the development of Middle East democracy has acquired greater urgency not least in the eyes of the U S which has bolstered its own efforts to spur democratic reform It will be important to assess the effectiveness of other democracy promotion activities including those undertaken by European counterparts This report seeks to inform discussion in U S policymaking circles by offering an assessment of multilateral European democracy promotion efforts in the Middle East **No More Killing Fields** David A. Hamburg, 2002 Drawing on work conducted by the Carnegie Commission on Preventing Deadly Conflict a study of the prevention of war and genocide examines such concepts as preventive diplomacy the role of civil society socioeconomic development and international cooperation **Perceptions and Policy in Transatlantic Relations** Natividad Fernández Sola, Michael Smith, 2009-01-13 In this book experts from both sides of the Atlantic examine the recent tensions between Western Europe and the United States over such issues as transatlantic security policies towards terrorism and relations with Russia and the former Soviet

Union against the broader background of perceptions and misperceptions in transatlantic relations Drawing on Professor Robert Jervis work *Perceptions and Misperceptions in International Politics* this book examines whether Jervis thesis has a new relevance given the current challenges in transatlantic relations Some of the issues examined include perceptions and misperceptions in general focusing on US foreign policy issues of decision making and implementation and issues of alliance management the capacity of the United States and the European Union to cooperate effectively within the broader transatlantic framework studies focusing on the alliance security dilemma and the transatlantic security community case studies of transatlantic relations in the war on terror and relations with Russia the present and future of the western alliance Providing a global and multilateral analysis from American and European perspectives and exploring fields of cooperation and competition *Perceptions and Policy in Transatlantic Relations* will be of strong interest to students of International Relations American politics and European politics

The EU and the European Security Order Rikard Bengtsson, 2009-09-10 This book attempts to conceptualise EU action in the field of regional security Drawing on constructivist theory the framework of the book focuses on the meeting or interface of actors a situation reflecting the mutual construction of self other and situation The analytical framework applied here to European security politics is potentially open ended as the theoretical logic that informs the framework is general and abstract in character and not limited to state actors in an international setting The empirical aim of this book is to further our understanding of the EU as a security actor in a regional perspective The book thus links International Relations scholarship with that of EU studies By analyzing a number of different interfaces such as with Russia the US and other states we can learn more about the circumstances and preconditions and with what resources and power the EU acts in a regional security setting This book will be of great interest to students of European security EU policy IR theory and security studies in general Rikard Bengtsson is Assistant Professor of Political Science at Lund University Sweden He has a PhD in Political Science from Lund University Sweden

Integration in Energy and Transport Alexandros Petersen, 2016-06-16 The South Caucasus has established itself as a corridor for transporting energy from Azerbaijan to Georgia Turkey and on to Europe symbolized by the Baku Tbilisi Ceyhan oil pipeline This new infrastructure has created an east west Eurasian bridge in which transnational extra regional actors especially the European Union and international financial institutions have played a critical role This book offers an original exploration of integration in the energy and transport sectors amongst Azerbaijan Georgia and Turkey and the capacity of this to fundamentally change relations between these countries In the period studied from the mid 1990s to 2008 integration in energy and transport did not result in broader political security and sociocultural integration in any significant way The author sets his analysis in a theoretical framework drawing on theories of integration but also grounds it in the detailed empirical knowledge that is the measure of true expertise

Approaching the Nuclear Tipping Point James E. Goodby, 2017-08-25 Globalization and technology have created new challenges to national governments As a result they now

must share power with other entities such as regional and global organizations or large private economic units. In addition, citizens in most parts of the world have been empowered by the ability to acquire and disseminate information instantly. However, this has not led to the type of international cooperation essential to deal with existential threats. Whether governments can find ways to cooperate in the face of looming threats to the survival of human society and our environment has become one of the defining issues of our age. A struggle between renewed nationalism and the rise of a truly global society is underway, but neither global nor regional institutions have acquired the skills and authority needed to meet existential threats such as nuclear proliferation. Arms control efforts may have reduced the excesses of the Cold War, but concepts and methodologies for dealing with the nuclear menace have not kept up with global change. In addition, governments have shown surprisingly little interest in finding new ways to manage or eliminate global and regional competition in acquiring more or better nuclear weapons systems. This book explains why nuclear weapons still present existential dangers to humanity and why engagement by the United States with all states possessing nuclear weapons remains necessary to forestall a global catastrophe. The terms of engagement, however, will have to be different than during the Cold War. Technology is developing rapidly, greatly empowering individuals, groups, and nations. This can and should be a positive development, improving health, welfare, and quality of life for all, but it can also be used for enormous destruction. This book reaches beyond the military issues of arms control to analyze the impact on international security of changes in the international system and defines a unique cooperative security agenda.
