psychology and displaying all of the brilliance that made *The Tipping Point* a classic *Blink* changes the way you'll understand every decision you make. Never again will you think about thinking the same way. Malcolm Gladwell redefined how we understand the world around us. Now in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about how we think without thinking about choices that seem to be made in an instant in the blink of an eye that actually aren't as simple as they seem. Why are some people brilliant decision makers while others are consistently inept? Why do some people follow their instincts and win while others end up stumbling into error? How do our brains really work in the office, in the classroom, in the kitchen, and in the bedroom? And why are the best decisions often those that are impossible to explain to others? In *Blink*, we meet the psychologist who has learned to predict whether a marriage will last based on a few minutes of observing a couple, the tennis coach who knows when a player will double fault before the racket even makes contact with the ball, the antiquities experts who recognize a fake at a glance. Here too are great failures of *blink*: the election of Warren Harding, New Coke, and the shooting of Amadou Diallo by police. *Blink* reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of thin slicing: filtering the very few factors that matter from an overwhelming number of variables. Drawing on cutting-edge neuroscience and psychology and displaying all of the brilliance that made *The Tipping Point* a classic, *Blink* changes the way you

understand every decision you make. Never again will you think about thinking the same way. **Summary of Blink**
