Animation in Croatia Midhat Ajanović, 2024-12-19 This book provides a comprehensive account of Croatian animation history as well as an analysis of background factors such as political and social circumstances and cultural heritage that influenced the great international success of Croatian animators between the 1960s and 1980s. The book focuses on the history of the Zagreb School of Animated Film which produced dozens of extremely significant animated films between the 1960s and 1980s which constituted an important epoch in the development of film animation as an artistic form. It provides a case study of three important films: *Dnevnik* by Nedeljko Dragic, *Don Kihot* by Vladimir Kristl, and *Koncert za masinsku pusku* by Dusan Vukotic. The book also covers modern Croatian animation developed after the independence of the country. This book will be of great interest to academics, students, and professionals working and researching in the field of animation.

Reimagining Characters with Unreal Engine's MetaHuman Creator Brian Rossney, 2022-12-29 Discover the power of Unreal Engine 5 and the MetaHuman Creator in this illustrated guide to develop realistic digital characters infusing them with full body and facial animation. Key Features: Create realistic characters using the MetaHuman Creator using a mixture of preset and custom tools. Import your character into Unreal Engine 5 to access more editing options and begin animating it. Combine face and body motion capturing to fully animate your digital humans. Book Description: MetaHuman Creator (MHC) is an online user-friendly 3D design tool for creating highly realistic digital humans that can be animated within Unreal Engine UE and enhanced with motion capture technology. This means that filmmakers and game developers now have access to a high quality, affordable solution that was previously only available to specialist studios. This book will focus on using UE5 and MHC from a filmmaker angle. Firstly, you'll understand how to use the online MHC to create a digital character, changing its facial structure, body type, and clothing. After that, you'll learn all the necessary steps to bring the character into UE5 and set it up for animation. Then, using an iPhone and a webcam to capture face and body movements, you'll mix these motion capture files, refine the animations using the MetaHuman Control Rig, and save these takes to be reused and edited again within the Level Sequencer. On top of that, you'll learn how to create a rendered video file for film production using both the Level Sequencer and a VR Cinematic Camera. By the end of this book, you'll have created your own MetaHuman character, as well as face and body motion capture data, and learned the necessary skills to give your future projects further realism and creative control. What you will learn: Create your own bespoke character using MHC. Develop custom faces based on real people. Utilize Blueprints to take control of your digital character. Retarget animations using the Unreal Mannequin. Use DeepMotion and Live Link for complete body and face animation. Use the Control Rig to refine animations. Export and render your character. Who this book is for: This book is for filmmakers and hobbyists who are planning to make a film using Unreal Engine for the first time, having worked in live action or purely digital media previously, either professionally or as a hobby. No

experience with Unreal Engine is required however it is useful to have some knowledge of 3D development applications and concepts like wireframes skin weights transform tools and motion capture It is recommended that you have access to an iPhone X or a later model Alternatively you can use a free or paid version of Faceware along with a basic webcam

Chinese Independent Animation Wenhai Zhou,2020-04-23 This study of independent animation opens up a quietly subversive and vibrant dimension of contemporary Chinese culture which hitherto has not received as much attention as dissident art or political activism Scholarly interest in Chinese animation has increased over the last decade with attention paid to the conventional media circle of production distribution and consumption The independent sector has been largely ignored however until now By focusing on distinctive independent artists like Pisan and Lei Lei and situating their work within the present day media ecology the author examines the relationship between the genre and the sociocultural transformation of contemporary China Animation the author argues has a special significance as the nature of the animation text is itself multilayered and given to multiple interpretations and avenues of engagement Through an examination of the affordances of this independent media entity the author explores how this multifaceted cultural form reveals ambiguities that parallel contradictions in art and society In so doing independent animation provides a convenient mirror for examining how recent social upheavals have been negotiated and how certain practitioners have found effective ways for discussing the post Socialist reality within the current political configuration
