Animal Health Human One Legacy:

One Health: The Human-Animal-Environment Interfaces in Emerging Infectious Diseases John S. Mackenzie, Martyn Jeggo, Peter Daszak, Juergen A. Richt, 2013-11-22 One Health is an emerging concept that aims to bring together human animal and environmental health Achieving harmonized approaches for disease detection and prevention is difficult because traditional boundaries of medical and veterinary practice must be crossed In the 19th and early 20th centuries this was not the case then researchers like Louis Pasteur and Robert Koch and physicians like William Osler and Rudolph Virchow crossed the boundaries between animal and human health More recently Calvin Schwabe revised the concept of One Medicine This was critical for the advancement of the field of epidemiology especially as applied to zoonotic diseases The future of One Health is at a crossroads with a need to more clearly define its boundaries and demonstrate its benefits Interestingly the greatest acceptance of One Health is seen in the developing world where it is having significant impacts on control of infectious diseases

More-than-One Health Irus Braverman, 2022-12-01 This edited volume examines the complex entanglements of human animal and environmental health It assembles leading scholars from the humanities social sciences natural sciences and medicine to explore existing One Health approaches and to envision a mode of health that is both more than human and also more sensitive to and explicit about colonial and neocolonial legacies urging the decolonization of One Health While acknowledging the importance of One Health the volume at the same time critically examines its roots highlighting the structural biases and power dynamics still at play in this global health regime The volume is distinctive in its geographic breadth It travels from Inuit sled dogs in the Arctic to rock hyraxes in Jerusalem from black faced spoonbills in Taiwan to street dogs in India from spittle bugs on Mallorca s almond trees to jellyfish management at sea and from rabies in sub Saharan Africa to massive culling practices in South Korea Together the contributors call for One Health to move toward a more transparent plural and just perception of health that takes seriously the role of more than humans and of nonscientific knowledges pointing to ways in which One Health can and should be decolonized This volume will appeal to researchers and practitioners in the medical humanities posthumanities environmental humanities science and technology studies animal studies multispecies ethnography anthrozoology and critical public health The Open Access version of chapter 1 available at <http://www.taylorfrancis.com/books/e/9781003294085> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Funded by the Wellcome Trust

Chiras, 2013 *Animals and the Shaping of Modern Medicine* Abigail Woods, Michael Bresalier, Angela Cassidy, Rachel Mason Dentinger, 2017-12-29 This book is open access under a CC BY 4.0 license This book breaks new ground by situating animals and their diseases at the very heart of modern medicine In demonstrating their historical significance as subjects and shapers of medicine it offers important insights into past animal lives and reveals that what we think of as human medicine was in fact deeply zoological Each chapter analyses an important episode in which animals changed and were

changed by medicine Ranging across the animal inhabitants of Britain s zoos sick sheep on Scottish farms unproductive livestock in developing countries and the tapeworms of California and Beirut they illuminate the multi species dimensions of modern medicine and its rich historical connections with biology zoology agriculture and veterinary medicine The modern movement for One Health whose history is also analyzed is therefore revealed as just the latest attempt to improve health by working across species and disciplines This book will appeal to historians of animals science and medicine to those involved in the promotion and practice of One Health today
