Becoming a Reader Michael P. O'Donnell, Margo Wood, 1999 *Becoming a Reader A Developmental Approach to Reading Instruction Second Edition* is intended as a basic developmental reading text for preservice and in service teachers It has been our experience in teaching undergraduate and graduate students in education that a developmental perspective of literacy learning provides a helpful framework for understanding the process We have found that most textbooks on reading methods are organized topically with chapters on word identification comprehension study strategies use of basal readers literature and classroom organization *Becoming a Reader* is organized differently We use a stage model of reading development to describe how children become skilled readers Specific topics such as word identification and comprehension are discussed within this broader framework The text represents a synthesis of current thinking about how literacy is acquired We have endeavored to produce a reader friendly text by providing concise descriptions of the various aspects of literacy learning and instruction supplemented by examples and case studies To avoid overburdening the reader with lengthy literature reviews we have cited only the most current and relevant sources to document and support the viewpoints presented As you read the text bear in mind that we regard literacy learning as a language learning process that is best acquired through the functional purposeful use of print The instructional methods we advocate reflect this basic premise

writing but multimodalities multiliteracies and critical literacies It is rich and comprehensive an invaluable resource for scholars educators and students of early childhood literacy Elsa Auerbach Professor of English University of Massachusetts Boston This book is unique in its broad consideration of topics and its global focus I particularly appreciate how the Editors have situated current research in an historical context They have also included development issues pedagogy research and the newest areas of interest critical literacy and popular culture Diane Barone University of Nevada Reno The editors and their contributors place a strong emphasis on literacy as a social practice that occurs outside school settings This broad interpretation is a healthy counter blast to the current political views and legislation in many developed countries and should be welcomed by practitioners Another very welcome dimension is the can do approach that celebrates young children s literacy achievements This is an informative and insightful text for researchers and students to dip into and think about for some years to come Marian Whithead writing in Nursery World An inspired and stimulating read aimed at researchers academics professionals and students in the fields of early years education and research and early childhood literacy It will also be of interest to those working in other disciplines such as cultural studies and sociology I think this collection of work by the range of authors some of which are the most distinguished and renowned in the field not only represents real value for money but also makes an essential in depth perceptive and invaluable contribution to this relatively new and dynamic field It offers some cutting edge contemporary and exciting material combined with well founded wisdom and indeed excellent sources for further reading British Journal of Educational Studies In recent years there has been a virtual revolution in early childhood studies with a mass of books and papers seeking to re examine and reposition childhood At the same time an equally significant area has developed within literacy studies reflecting a growing interest in the nature of literacy as a socially situated phenomenon There is increased interest in literacy as a multimodal concept in which symbolic meaning is a central concept rather than more conventional and narrower notions of literacy The Handbook of Early Childhood Literacy is central in providing access to all these different perspectives The Handbook offers a way through the vast diversity of publications on early childhood literacy by providing comprehensive and up to date reviews of research and thinking in early childhood literacy The arrangement of chapters reflects a contemporary perspective on research into early childhood literacy Major sections include the global world of early childhood literacy childhood literacy and family community and culture the development of literacy in early childhood pedagogy and early childhood literacy and researching early childhood literacy Contributions by leading authorities focus on literacy as a socially situated and global experience one that is evolving in relation to changes in contemporary culture and technological innovation *Assessing and Addressing Literacy Needs* Barbara Combs, 2011-04-07 *Assessing and Addressing Literacy Needs* Cases and Instructional Strategies is designed to help preservice and inservice teachers understand the problems that children encounter when learning to read and to provide key instructional strategies related to best practices in literacy instruction The text promotes reflection and analysis that will
