Anger In The Workplace Understanding The Causes Of Aggression And Violence:

Anger in the Workplace Seth Allcorn,1994 Anger in the Workplace explores what it means to feel angry at work Anger has its origins in anxiety that arises from feeling frustrated humiliated or threatened at work Anxiety creates a biological and psychological readiness to act which is guided by whether it is acceptable to feel angry at work Employees are more likely to act responsibly if they feel that their anger is acceptable They may also act in ways that are destructive to self others and the workplace if they feel that being angry is not acceptable Managing the development of anger and its expression in the workplace is an important aspect in designing a better workplace The book defines anger and aggression by synthesizing biological psychological and social perspectives The social acceptability of anger and the fear that it interferes with judgment and results in aggression are discussed as are sex and gender based differences in the experience of and expression of anger and aggression Learning to cope with anger and the importance of owning one's anger thinking it through and acting upon it constructively are also discussed Depending how anger is acted out it can be the source of major contributions to innovation and productivity or a major blocker of change and work The book explores how the workplace is a contributor to feeling angry because it promotes feelings of helplessness alienation and worthlessness Hierarchical organization power and authority relations and leadership styles contribute to the development of these feelings Desire for attachment and the fear of abandonment and desire for autonomy and fear of engulfment in the workplace must be managed to avoid anger The book concludes by reviewing the relationship between anger and organizational dynamics
