Globalization and Animal Law Thomas G. Kelch,2017-05-01 The rise of the globalized economy has rendered an even more profound change in the relationship between humans and other animals than the ancient progression from huntergatherer to agricultural society In today s global markets multinational corporations exploit the economic value of animals throughout the world on an unprecedented scale The philosophical and legal notions that animals are mere unfeeling machines or pieces of property although more or less taken for granted for centuries has been

challenged if not burst asunder in recent decades in law moral philosophy and cognitive and other sciences and regulation of the treatment of animals in agriculture experimentation entertainment and other areas has begun to make substantial inroads in national and international law This book provides a detailed analysis of international and comparative animal law focusing on the impact of today's globalized economy on animal law Describing a wide range of domestic and international laws relating to the treatment of animals the author explicates the sorts of legal rules which affect the global animal marketplace Representative norms in existing animal protection laws are analyzed and critiqued illustrating the diverse approaches taken by different countries and by the international community in regulating uses of animals Among the issues covered are the following contemporary philosophical thought on the relationship between humans and animals recent scientific research relating to cognitive and other abilities of animals legal issues relating to factory farming and animal slaughter legal protection of animals during transport regulatory schemes on animal experimentation laws on the use of animals in entertainment laws on protection of companion animals regulation of trade in endangered species international trade issues relating to animals including consideration of the provisions of GATT and the seminal WTO GATT decisions in the Tuna Dolphin Shrimp Turtle Tuna Labeling and EU Seal Products cases constitutional protection for the interests of animals intellectual property law issues relating to animals efforts to have the legal personhood of certain animals judicially recognized and what the future may hold for animal law in the global economy To ensure the consideration of a full range of legal approaches the laws analyzed come from a wide variety of countries and jurisdictions including Australia Austria Brazil Canada the EU Germany India Ireland New Zealand Switzerland the UK and state and federal laws of the US Numerous international treaties and conventions relevant to animal treatment and animal law are also covered including the Berne Convention for the Protection of Literary and Artistic Works the CITES Convention the European Convention for the Protection of Animals Kept for Farming Purposes the European Patent Convention the GATT Treaty the TRIPS Agreement and the Universal Copyright Convention It is not difficult to grasp given the continuing increases in production consumption and use of animals and animal products worldwide that legal initiatives in this often emotional and acrimonious area of law are frequently contentious and hard fought But this is really just the dawn of animal law which has only recently become recognized as an important cutting edge topic and this area of the law promises to develop rapidly in the future This book is enormously valuable in contributing to the continuing development and understanding of this law clearly laying out the contours and boundaries of existing animal laws in our global economy and allowing legal educators concerned lawyers and policymakers to teach formulate proposals argue cases and defenses and secure a firm purchase on future trends and developments in animal law

Emergencies and Public Health Crisis Management- Current Perspectives on Risks and Multiagency Collaboration Amir

Khorram-Manesh, Frederick M Burkle, 2020-12-11 The successful management of emergencies and public health crises depends on adequate measures being implemented at all levels of the emergency chain of action from policy makers to the general population It starts with appropriate risk assessment prevention and mitigation and continues to prehospital and hospital care recovery and evaluation All levels of action require well thought out emergency management plans and routines based on established command and control identified safety issues functional communication well documented triage and treatment policies and available logistics All these characteristics are capabilities that should be developed and trained particularly when diverse agencies are involved In addition to institutional responses a robust community based disaster response system can effectively mitigate and respond to all emergencies A well balanced response is largely dependent on local resources and regional responding agencies that all too often train and operate within silos with an absence of interagency cooperation The importance of this book issue is its commitment to all parts of emergency and public health crisis management from a multiagency perspective It aims to discuss lessons learned and emerging risks introduce new ideas about flexible surge capacity and show the way it can practice multiagency collaboration

The Terrorization of Dissent Jason Del Gandio, Anthony J. Nocella II, 2014-06-30 In 2006 the Animal Enterprise Terrorism Act AETA was passed with the intention to equip law enforcement agencies with the tools to apprehend prosecute and convict individuals who commit animal enterprise terror But as many have come to realize this act does not concretely define what is meant by that phrase leading to the interpretation that anyone interfering with a company s ability to make a profit from the exploitation of animals can be considered a terrorist In this unprecedented and timely collection some of the most influential voices in the

world of law and animal rights examine the legalities of the AETA highlight its repressive nature and the collusion between private interests and political legislation and provide theoretical frameworks for understanding a variety of related issues In a series of interviews the book also gives animal advocates who have been convicted or directly affected by the AETA including members of the AETA 4 and SHAC 7 an opportunity to speak for themselves Ultimately these writers show that the AETA is less about fighting terrorism and more about safeguarding corporate profit and that it should be analyzed and resisted by everyone who believes in a better world Featuring Piers Beirne Sarahjane Blum Heidi Boghosian Walter Bond Joseph Buddenberg Sarat Colling Kimberly E McCoy Jason Del Gandio Scott DeMuth Carol L Glasser Jennifer D Grubbs Josh Harper Stephanie Jenkins Jay Johnson Eric Jonas Michael Loadenthal Dara Lovitz Lillian M McCartin Anthony J Nocella II David Naguib Pellow Will Potter Dylan Powell Ryan Shapiro Wesley Shirley John Sorenson Vasile Stanescu Brad J Thomson and Aaron Zellhoefer Extraordinary Jobs with Animals Alecia T.
