Animals That Hunt The World Of Survival:

The World of Survival Michael Allaby,1979 *Animals and Women* Carol J. Adams,Josephine Donovan,1995-11-14

Animals and Women is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense Offering a feminist perspective on the status of animals this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species Furthermore it demonstrates that such a focus does not distract from the struggle for women s rights but rather contributes to it This wide ranging multidisciplinary anthology presents original material from scholars in a variety of fields as well as a rare early article by Virginia Woolf Exploring the leading edge of the species gender boundary it addresses such issues as the relationship between abortion rights and animal rights the connection between woman battering and animal abuse and the speciesist basis for much sexist language Also considered are the ways in which animals have been regarded by science literature and the environmentalist movement A striking meditation on women and wolves is presented as is an examination of sexual harassment and the taxonomy of hunters and hunting Finally this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse and that to deny this connection is to participate in the continued mistreatment of animals and women *Keepers of the Animals* Michael J.
