3. Upon completion of the moon phase diagrams it should be possible to observe any phase of the moon in the actual sky and determine the phase of the moon from its appearance, the position of the sun and moon, or the moon's location with respect to the horizon. On page 7 are several representations of the horizon with compass directions indicated, and a photograph of the moon in a particular phase. Based on these representations complete the follow-

ing parts a - e of this question.

- a. For each of the representations below A - F determine and indicate the direction of elongation of the moon, that is indicate whether the moon is either east (E) or west (W) of the sun.
- b. Using the direction of elongation and the general shape of the moon, determine the phase of the moon and indicate the phase below each representation.
