Foundations of Education: Instructional strategies for teaching children and youths with visual impairments M. Cay Holbrook, Alan J. Koenig, 2000

Shaping Early Childhood: Learners, Curriculum and Contexts Glenda Mac Naughton, 2003-12-16 This should be essential reading for anyone involved in the training and professional development of early years practitioners It is an impressive analysis of the historical and contemporary big ideas that have influenced societies and practitioners views of children and the nature of the curriculum There are powerful sections on parents and communities I particularly liked the stimulating ideas galleries with their statements from researchers policy makers and practitioners around the world Nursery World October 2004 This key textbook introduces students and practitioners to a wide range of different approaches to early childhood It provides practical strategies for developing and implementing early learning experiences that promote excellence and equity for children The book presents the latest research and thinking about good practice discusses how various philosophies and beliefs influence decisions in early childhood education and identifies the key thinkers behind each approach By examining different perspectives the book helps early childhood practitioners to navigate their way through competing views make informed choices and be critically reflective in their work In an accessible lively and user friendly way it explores issues such as What constitutes an appropriate early childhood curriculum How best to study and assess children Involving parents and children in early childhood learning The book features a range of pedagogical devices to inspire early childhood workers to reflect critically on their work and the ideas underpinning it including Boxed definitions of key terms Ideas summary charts and ideas galleries Clarification exercises Case studies Further reading lists This essential textbook is ideal for students undertaking early childhood qualifications at degree level Masters courses in early childhood education and for practitioners who work with children from birth to eight in early childhood settings

Child Observation for Learning and Research Theodora Papatheodorou, Paulette Luff, Janet Gill, 2013-12-19 Child Observation for Learning and Research is an exciting new text providing a thorough grounding in the methodology practice and interpretation of observing children The authors draw on their experience and expertise in childcare education social work and research to introduce the fundamental principles and process of observation preparing you for your first observation and building knowledge and confidence through a wide range of scenarios and activities The book takes the unique approach of demonstrating how acquiring observational skills can serve as a key learning tool not only helping you to understand children but also to recognise analyse and question theory

helping you make sense of your own learning *Innovations* Linda G. Miller, Kay Albrecht, Kay M. Albrecht, 2001 A comprehensive 40 hour self directed manual is just what teachers need to effectively implement one of the best toddler curriculum resources *Innovations The Comprehensive Toddler Curriculum* This guide is specially designed for teachers who are new to the world of care and early education of toddlers as well as those who are experienced toddler educators Teachers explore *Innovations* wide view of curriculum as inclusive of interactions activities and experiences parent partnerships environment teaching observation and assessment and child development Dr Albrecht is widely known as an advocate for high quality care and early education opportunities for all children Dr Miller with over 25 years of direct experience in education is a national speaker and consultant Child Observation Ioanna Palaologou, 2019-09-23 This is a key text that enables students to appreciate and understand the central role of observation in understanding planning for and educating early years children It explores the theoretical background to child observation and links it back to practice Recent important research in the field of child observation is highlighted and ethical implications of research in early childhood are considered This is essential for all those studying for degrees and foundation degrees in early childhood early years and related disciplines and for Early Years Teacher candidates Updated in line with recent policy and legislation changes A new chapter on observation documentation in the multi modal age Includes new material and case studies that explores the essential elements of child observation across the world Research chapter re written to make it more accessible for all students More case studies throughout linking theory to practice Classroom Literacy Assessment Jeanne R. Paratore, Rachel L. McCormack, 2007-04-05 Showcasing assessment practices that can help teachers plan effective instruction this book addresses the real world complexities of teaching literacy in grades K 8 Leading contributors present trustworthy approaches that examine learning processes as well as learning products that yield information on how the learning environment can be improved and that are conducted in the context of authentic reading and writing activities The volume provides workable nuts and bolts ideas for incorporating assessment into instruction in all major literacy domains and with diverse learners including students in high poverty schools and those with special learning needs It is illustrated throughout with helpful concrete examples Early Childhood Education Petr G. Grotewell, Yanus R. Burton, 2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending

on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first identity Because this is a crucial part of children s makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience
